vengeance..Jay began speaking earnestly and in a low voice. "My father asked me to find you. It's urgent. One of the people the SDs are looking for is at the house. Stern has arrested the whole of Congress, and we're pretty sure he's going to issue an ultimatum with the Military. If they do the Chironians will take out the whole ship. Pa wants to go with our guy and talk to Kath to see if they can do something, but they need help getting out of Phoenix."..standing on a slippery surface.."He ought to be given a chance to go and look at it," Borftein agreed with a nod. "What would be the best way to arrange something like that?".The bag was folded and sealed. Noah peeled back the tape, opened the flap, and half extracted a wad."Lock at condition orange and ready to close."..snake tattoo on his arm and the platitude on his T-shirt..He blinks, thinking furiously, striving to comprehend what she has suggested, but he can't avoid the beautiful. He knotted his brows and directed an inquiring look at each of them in turn..surpluses of power at grossly high prices. Utility rates had soared. Geneva couldn't afford to use the air."Used to be. Is it that obvious?". "I trust we'll all stay friends and keep in touch," Eve said..The Mayflower II had the general form of a Wheel mounted near the thin end of a roughly cone-shaped axle, which was known as the Spindle and extended for over six miles from the base of the magnetic ram scoop funnel at its nose to the enormous parabolic reaction dish forming its tail..Then, slowly, she realized what her mind had responded to unconsciously in the faces of the three children in the Chironian sculpture. The artist had been not merely an expert, but a master. For fear was there too, not in any way that was consciously perceptible, but in a way that slipped subliminally into the mind of the beholder and gripped it by its deepest roots. That was why she had felt disturbed all the way back from Franklin. But there was still something else. She could feel it tugging at the fringes of awareness-something deeper that she hadn't grasped even yet. She turned her eyes to the sculpture again..Leilani went into the bathroom, switched on the light and the fan. She closed the door and locked her."By your customs," the Chironian observed..of Planets, and Leilani waving goodbye with an American flag in one hand and a Fourth of July sparkler.much sun." ..Leilani didn't have a fearsome capacity for violence, maybe not any. He thought for a few seconds. "I hope you're not planning anything too tough out them. I mean, Jay hasn't exactly had a lot of practice at. that kind of thing. He's never even seen a planet before." Jay winced under his breath and looked away..leadership temporarily to his brave companion.."Does it do-that a lot?" Colman asked from his chair, which had been cleared of a pile of books and some stuffed birds to make room for him. when they had arrived an hour or so earlier..Pretending that the thorny tentacles of the bloomless rosebush had threatened her, she turned to confront."So-o-o-o?". "The Circle serves all age groups now. It really works. You learn there may be a million questions in life."That's so true," Eve agreed..Chewing the final bite of her chicken sandwich, Geneva said, "The police were useless, dear. I had to."Yes, I can, and no, there aren't. Why--getting fed up?".of the battle zone..If Death had pockets in his robe, they smelled like this filthy carpet. Nauseating waves of righteous anger.Oblivious of Micky, Sinsemilla sat, elbows propped on her knees, chin cupped in the heels of her hands,"The best thing would be to blow that door with a salvo of AP missiles before we move, and hope they jam it open," he murmured to Swley, who was lying next to him, examining the far bulkhead through an intensifier. "Then maybe drench the lock with incendiary and go in under smoke."..As Curtis realizes that somehow he has further offended her, hot tears blur his vision. "It's a security matter, isn't it? The Chironians have left it to us by default, and it's their security at stake as well as ours. The Pagoda's only two years away. Somebody's got to take the helm in all this.".."Guard detail, file left and right by sections," Sirocco said at the front. "Section leaders forward." He moved out into the aisle, where the floor had folded itself into a steep staircase to facilitate fore-and-aft movement, and climbed through into the

side-exiting lock chamber with Colman and Hanlon behind him while Red and Blue sections formed up in the aisles immediately to the rear. In the lock chamber the inner hatch was already open, and the Dispatching Officer from the shuttle's crew was carrying out a final instrumentation check prior to opening the outer hatch. As they waited for him to finish and for the rest of the delegation to move forward in the cabin behind, Colman stared at the hatch ahead of him and thought about the ship lying just on the other side of it that had left Earth before he was born and was now here, waiting for them after crossing the same four light-years of space that had accounted for a full half of his life. After the years of speculations, all the questions about the Chironians were now within minutes of being answered. The descent from the Mayflower II had raised Colman's curiosity to a high pitch because of what he had seen on the screen. For despite all the jokes and the popular wisdom, one thing he was certain of was that the engineering and structural modifications that he had observed on the outside of the Kuan-yin had not been made by irresponsible, overgrown adolescents. "Only one boy in a wheelchair, as far as I know." Kath's pocket communicator buzzed, and she took it out to answer. It was Adam, who had heard the news and was checking to make sure that she and Colman were all right. Colman left her talking and moved over to where Anita was standing near the door on the fringe of the party assembling to depart. "Why'd you ever get mixed up with that bunch?" he murmured. "Wise up when it's all over. Get out of it." "The Army's on its way through the Spindle," Lesley said to Brad. Bernard stared at his glass for a few seconds, then shook his head again. "I can't buy it," he said. "We've never seen anything or heard any mention of anything to do with strategic weapons. Lechat glanced uneasily in Celia's direction for a moment and then looked back. "Howard Kalens," he said in a lower voice. "Couldn't that have been a final warning? Look at the effect it's having on the Army, except that they don't seem to be reading the right things into it." He looked at Jay. "I can't see that they've got it all figured out. They can't have." But Lesley was not listening as he gazed down at the platform below, which fanned outward from the arc lights above the lock to become indistinct in the darkness of the antechamber. Figures - were moving slowly from the shadows by the transit tubes and freight rails, spread thinly at the back, but closing up as they converged with the lines of the platform. They were moving carefully, in a way that conveyed caution rather than stealth, and seemed to be avoiding cover deliberately. And they were carrying their weapons underarm with the muzzles trained downward in a manner that was anything but threatening. Smiles and grins relieved the solemn atmosphere that had seized the room. From the direction of the table, Jean emitted an audible sigh of relief. Bernard grinned up at the screen. "Thanks," he said. "We're all glad to hear it. Talk to you again soon." Kath gave a quick smile and vanished from the screen. candles on the table. "Dr. Doom is my teacher, on paper, but the fact is I'm self-taught. The word for it is. Even more remarkable was another prediction that followed from the Chironian symmetry relationships, which required the creation of an "antiuniverse" along with the universe, populated by antimatter and consisting of an extraordinary realm in which "antitime" ran backward and "antispacetime" contracted from an initial volume of zero, Universes, like particles, were created in pairs. And it was the duality of universes, each exhibiting a spacetime decomposed into two discrete dimensions, which gave rise to the two-way duality manifested by tweedles and antitweedles: Dums, dees,

antidums, and antidees were simply spacelike, timelike, antispacelike, and antitimelike projections of the same fundamental entity existing in the timeless, spaceless domain of tweedlespace..Chapter 14.He's rapidly losing confidence. A long silence went by while they took it all in. It meant that ever since planetfall, the Mayflower II had been shadowed in orbit around Chiron by a weapon that could blow it to atoms in an instant. And the camouflage had been perfect; the Terrans themselves had put it there. It was the most lethal piece of weaponry ever conceived by the human race. No wonder the Chironians had been able to cover every bet put on the table and play along with every bluff. They could let the stakes go as high as anybody wanted to raise them and wait to be called; they'd been holding a pat hand all the time. Or was it the Smith and Wesson that Chang had mentioned at Shirley's, perhaps not so jokingly?. maze of work aisles along which a stooping-crouching-scuttling boy might be able to escape.
