"Sometimes," Shirley answered. "Ci teaches English mainly, but mostly down on the surface. That is, when she's not working with electronics or installing plant wiring underground somewhere. I'm not all that technical. I grow olives and vines out on the Peninsula, and design interiors. That's what brought me up here--Clem wants the crew quarters and mess deck refitted and decorated. But yes, I teach tailoring sometimes, but not a lot." "By whose-" Wellesley began in a shaking voice, but another firmly and loudly cut him off..got my orders." "So have I." "That's different." "Well . . . sure," he said cautiously. "If it wouldn't be any trouble to anyone. You must have talked to the two guys who were here earlier."..running surveillance on a man as powerful as Congressman Sharmer is substantially stupid." "Not likely." Colman looked away in a daze. Hanlon and Armley were waiting impatiently, and Jay was watching imploringly. He thought furiously. Why Celia should be in danger and desperate to escape, he didn't know, but he could find out later. If he said he had to get away for a few hours. Sirocco would cover for him, so that was okay. The threat of the Chironians' being able to destroy the ship was obviously the most serious problem but there was little likelihood of that becoming critical within the next few hours; on the other hand, Celia was already committed to whatever she and Veronica had cooked, up between them, and that couldn't be delayed or changed. So Celia would have to come first. Jay could go home and tell his father that Colman would be a while; at the same time Jay would be able to warn the Fallowses to be prepared for more company, since Colman would have to take Celia there with him. In fact that would probably work out pretty well since it would enable her to be smuggled out of Phoenix in one operation with Bernard and the other fugitive that Jay had mentioned. Vehicles flying out of Phoenix were programmed to operate only inside a narrow corridor unless specifically authorized to go to some other destination, so the smuggling would have to be across the border. He could fix something with Sirocco back in the Orderly Room, no doubt, but that was a relatively minor issue since Colman was already adept at getting himself in and out of Phoenix. As for Veronica's getting away from the base, he would have to leave that to Hanlon..~Driscoll was feeling more relieved. If what he had seen so far was anything to go by, the Chironians weren't going to start any trouble. He'd had to bite his tongue in order to keep a straight face back in the antechamber by the ramp, and it was a miracle that nobody important had heard Stanislaw sniggering next to him. The Chironians were okay, he had decided. Everything would be okay.. provided that ass-faces like Farnhill didn't go and screw things up..Celia managed a smile. Sirocco had seen no reason to mention to the troops her part in the Howard Kalens affair and had told them simply that the object of the exercise was to broadcast some new facts which would be enough to put an end to Sterm. "Fm not sure what Fm supposed to say," she told Hanlon. "I'll never be able to thank you both enough. But after talking to Sterm about it, Kalens had accepted that an attempt to impose authority over Chiron overtly would risk alienating the Mission's population. A more subtle approach was called for. "Ultimately, human instincts cling to the known and the familiar," Kalens lectured Borftein later. "A visible commitment to lawfulness as a alternative to the lawlessness of this planet is the way to maintain cohesiveness. We can't afford to jeopardize that." So Borftein had -agreed to try playing the game their way, which hinged upon provisions written into the laws to take account of the abnormal circumstances of a twenty-year voyage through space..put it, but because of a self-destructive impulse..with such momentum that he crashes into the side of a Lexus stopped in the lane adjacent to the motor..too hardened to be moved by the plight of anyone else. And he's studied extensively since we left Earth. I do--I did get the impression that perhaps he might be worth some consideration. But of course that's just an opinion." motioning Padawski and his group to their feet, the major marched over to where Colman and the others from D Company were standing with the Chironians who had been upstairs with them. He had already taken their names and established that they had not witnessed the incident firsthand. "You guys are free to go," he informed them. "If there's a hearing, you might be called in to testify. If so, the appropriate people will contact you." Fierce as she has never been before, Old Yeller lunges toward the woman. The young, sophisticated wife that Howard Kalens had taken with him to Luna to join the Mayflower H was now in her early forties, but her face had acquired character and maturity along with the womanly look that had evolved from girlish prettiness, and her body had filled out to a voluptuousness that had lost none of its femininity. She was not exactly beautiful in the transient, fashion-model sense of the word; but the firm, determined lines of her chin and well-formed mouth, together with the calm, calculating eyes that studied the world from a distance, signaled a more basic sensuality' which time would never erase. At the end of that period New America extended from Alaska to Panama, Greater Europe had incorporated Russia, Estonia, Latvia, and the Ukraine as separate nations, and China had come to dominate an Eastern Asiatic Federation stretching from Pakistan to the Bering Strait. All three of the major powers had commenced programs to reexpand into space at more or less the same time, and since each claimed a legitimate interest in the colony on Chiron and mistrusted the other two, each embarked on the construction of a starship with the aim of getting there first to protect its own against interference from the others..as if satisfied that everything was now clear. It wasn't. "Why? What happens with them?" Bernard asked. Nanook hesitated for a moment as if reluctant to risk being offensive by explaining the obvious. He shrugged. "Well . . . usually somebody ends up shooting them," he replied. "So it never gets to be .a real problem."The girl gave Colman a funny look. Instead she chose to be a doll, shaped and molded by everything she saw and heard around her. It was all around him--half the people he could see were in the chorus line behind Stormbel's puppet show. They could be told what to think because they didn't want to think. Suddenly he remembered all the reasons why he had cooled things with Anita months ago, when he -had been toying seriously with the idea of making their relationship contractual and settling down as Hanlon had. He had tried to tune into her wavelength and found nothing but static. I ordered-" Chaux cut him off with a flip of a switch and at the same time closed a speech circuit to the loudspeakers commanding the lock area. "Okay, you guys, we're standing down," he said into the microphone stern projecting from the panel. "Get in here as quick as you can. We've got trouble coming up a feeder ramp on the other side." "I'll trade," Stanislaw offered at once..turned. "Say, Michelina Bellsong, did I ask whether you believe in life after death?". "You're a temptation," he admitted. "But I'm married." Glancing at his hands, seeing no rings, she said.. "Detail ... stop" the girl called out. The robot halted. "Detail . . . Oh, I don't know what I'm supposed to say. Stand with your feet apart and put your gun down." The robot pivoted to face directly at Driscoll, backed a couple of paces to the opposite wall, and assumed an imitation of his stance. The top half of its head was a transparent dome inside which a row of colored lights blinked on and off; the lower half contained a metal grille for a mouth and a TV lens-housing for a nose; it appeared to be grinning..was neither.
