The metals-extraction sub complex made use of the high fusion temperatures available on-site to reduce seawater, common rocks, and sands, and all forms of industrial and domestic waste and debris to a plasma of highly charged elementary ions which were then separated cleanly and simply by magnetic techniques; it was like an industrial scale mass spectrometer. In the chemicals sub complex a range of compounds such as fertilizers, plastics, oils, fuels, and feedstocks for an assortment of dependent industries were also formed primarily by recombining reactants from the plasma state under conditions in which the plasma radiation~ was tuned to peak in a narrow frequency band that favored the formation of desired molecules and optimized yields without an excess of unwanted by-products; which was far more efficient than using broad-band thermal sources of combining energy. The plasma method did away with most of the vats and distilling towers of older technologies and, moreover, enabled bulk reactions, which in the past would have taken days or even weeks, to proceed in seconds--and without requiring catalysts to accelerate them.. "Hell, that's no surprise to me," the red-haired man declares, but the tail of Curtis's shirt remains twisted.those fangs in her cheek or her nose. Then people would never think of her as sassy, but would always. Corporal Swyley wasn't saying anything, which was significant because Swyley was usually a pretty good judge of what was what. His silence meant that he didn't agree with what was being said. When Swyley agreed with something, he said he didn't agree. When he really didn't agree, he said nothing. He never said he agreed with anything. When he had decided that he felt fine after the dietitian discovered the standing order for spinach and fish, the Medical Officer hadn't been able to accuse him of faking anything because Swyley had never agreed with anybody that he was sick; all he'd said was that he had stomach cramps. The M.O. had diagnosed that anybody with stomach cramps on his own time had to be sick. Swyley hadn't. In fact, Swyley had disagreed, which should have been obvious because he hadn't said anything..than to a queen. Though both nightstand lamps were aglow, a scarlet silk blouse draped one lampshade,. "It is from my perspective,? said Leilani..Marie, who had been exploring the house, emerged from the elevator. "The basement is huge!" she told them. "There are all kinds of rooms down there, and I don't know what they're for. I could have my own room to draw things in. And did you know there's another door down there that leads out to a tunnel? "They've had their chance. If they've run away and left it for us, let's take it. Why mess around?" .CHAPTER THIRTY-THREE.its nickel-iron core was somewhat smaller than Earth's, which gave it a comparable gravitational force at the surface. It turned in a thirty-one-hour day about an axis more tilted with respect to its orbital plane than Earth's, which in conjunction with its more elliptical orbit--a consequence of perturbations introduced by the nearness of Beta Centauri--produced greater climatic extremes across its latitudes, and highly variable seasons. Accompanied by two small, pockmarked moons, Romulus and Remus, Chiron completed one orbit of Alpha Centauri every 419.66 days..Later, when she poured a third portion of vodka more generous than either of the previous rounds, she.Leilani's palms were still damp. She blotted them again. In spite of the August heat, her hands were cold..THE MOVIE SHOWING on the wall screen in the dining area of the Fallowses' upper-middle-echelon residential unit in the Maryland module was about the War of 2021, and Jay Fallows was overjoyed that it had reached an end. The Americans were tall, muscular, lean bodied, and steely eyed, had wavy hair, and wore jacket-style uniforms with neckties, which was decent and civilized. The Soviets were heavy jowled, shifty, and unscrupulous, had short-cropped hair, and wore tunics that buttoned to the throat, which meant they wanted to conquer the world. The Americans possessed superi6r technology because they had closer shaves.. The cart shut up, turned itself around, and returned dejectedly to

the line to await another victim..If the Chironians were already fitting out the Kuan-yin, they must have solved a lot of the problems that were still being argued on Earth, Colman thought. The whole planet, he realized as he reflected on it, was a powerhouse of progress, unchecked by any traditions of unreason and with no vested-interest obstructionists to hold it back. If the pattern continued until Chiron became a fully populated world, it would effectively leave Earth back in the Stone Age within a century. "Have you actually flown it anywhere yet?" he asked, turning his head toward Kath. "The Kuan-yin . Has it been anywhere since it arrived in orbit here?".He hears his mother's voice in his mind: In the quick, when it counts, you must have no doubt. One door slams, then the other..performance, she could move with a degree of gracefulness and even with surprising speed for short.Talking to Jay had brought to the surface a lot of things that Colman usually preferred not to think about. Life was like the Army: It took people and broke them into little pieces, and then put the pieces back together again the way it wanted. Except it did it with their minds. It took kids' minds while they were plastic and paralyzed them by telling them they were stupid, confused them with people who were supposed to know everything better than they did but wouldn't tell them anything, and terrified them with a God who loved everybody. Then it drilled them and trained them until the only things that made sense were those it told them to think. The system had turned Anita into a doll, and it was trying to turn Jay into a puppet just as it had turned Bernard into a puppet. It turned people into recording machines that words went into and came out of again . and made them think they knew everything about a planet full of people they'd never seen, just as it blew black guys' brains out because they wanted to run their farms and didn't want their kids nailed to walls, and then told the civilians in Cape Town it was okay. And what had it done to Colman? He didn't know because he didn't know how else it might have been.."How long before the Kuan-yin is eclipsed?" Sterm asked, looking across at Stormbel, who was supervising the preparations to detach. He had intended taking advantage of the Mayflower II's cover until after the strike was launched, but the unexpected loss of the rest of the ship, coupled with Lesley's treacherous change of sides in the hexagon and the arrival of assault troops outside the Battle Module itself had forced him to revise his priorities. There would be lime point in destroying the Kuan-yin if he lost the Battle Module in the process..Young had a gash on his cheek that was more messy than deep and a huge bruise along his jaw to go with it, and..Driscoll was feeling more relieved. If what he had seen so far was anything to go by, the Chironians weren't going to start any trouble. He'd had to bite his tongue in order to keep a straight face back in the antechamber by the ramp, and it was a miracle that nobody important had heard Stanislaw sniggering next to him. The Chironians were okay, he had decided. Everything would be okay.. . provided that ass-faces like Farnhill didn't go and screw things up..by then? Somewhere, anywhere, everywhere, waiting. "I made no mention of your wanting to save yourself physically. I have already pointed out that we are both realists, so there is no need for you to feel any obligation to pretend that you misunderstood." He paused as if to acknowledge her right to reply, but gave the impression that he didn't expect her to. She raised her glass to her lips and found that her hand was trembling slightly. Sterm resumed. "The dream has crumbled away, hasn't it, Celia. I know it, you know it, and a part of Howard's mind knows it deep down inside somewhere while the rest is going insane. You expected to share a world, but instead all you stand to share is a cell with a madman. The world is still out there but you cannot accept it as it is, and Howard will never be able to change it now." Sterm extended a hand expressively. "And the future awaits you." He paused again, watched as Celia lowered her eyes, and nodded. "Yes, I could persuade Wellesley to overrule the eviction orders, or arrange for Borftein to reinforce the Phoenix garrison, put SDs around the house so that you would never have need to fear for your safety. But is that what you want me to do?". "My department?". "We have to allow for the possibility and prepare accordingly," Borftein replied. Colman went through the door into the pump compartment and emerged onto a railed platform part way up one side of a tall bay extending upward and below, divided into levels of girders and struts with one of the huge pumps and its attendant equipment per level. On the level below him, a group of engineers and riggers was working on one of the pumps. They had removed one of the end-casings and dismantled the bearing assembly, and were attaching slings from an overhead gantry in preparation for withdrawing the rotor. Colman leaned on the rail to watch for a few moments, nodding to himself in silent approval as he noted the slings and safety lines correctly tensioned at the fight angles, the chocks wedging the rotor to

avoid trapped hands, the parts laid out in order well clear of the working area, and the exposed bearing surfaces protected by padding from damage by dropped tools. He liked watching professionals. "Congratulations, Steve," Bernard said, still smiling. "I wonder what those guards are doing right now." "It couldn't fire anyway," Kath replied. "It's modifications aren't completed yet. We've already told you that." demand. Since we are not talking about a technologically backward environment, a considerable degree of expertise in modern industrial processes would be essential to the fulfillment of that obligation, which gives us, in Engineering, an indispensable role. I trust you see my point." He hesitates on the threshold, troubled by both the risk that he's taking and the crime he's intending to see movies about serial killers. These human monsters collect souvenirs of their kills. Some keep. "Ah, why don't we wrap it up and have the next one up in Rockefeller's," Hanlon suggested. And for such a system the universal law was not death, but life. Music began playing, the crowd dispersed back to the bar and tables, and conversations started to pick up again. Colman and his companions went back upstairs, and Driscoll collected another round of drinks from the bar while the others sat where they had been earlier. They talked for a while about the incident, agreed it was a bad thing to have happened, wondered what would come of it, and eventually changed the subject. "Someone you know?" Colman asked. she's gotten a better smell of the cunningly deceptive grandfatherly stranger in the toilet cubicle and now. By the time he nears the public road, he can no longer hear the terrible cries, only his explosive. "Really. It's a rosebush." "Ye-es," Bernard said slowly, nodding to himself. "He'd know the situation, and he'd probably know a safe way through the border even if some trouble breaks out." He began nodding more strongly. "And we certainly know we can trust him." Smiling at his reflection, the stranger says, "Tom Cruise, eat your heart out. Vern Tuttle rules." the snake. Micky observed. "Flat as a slice of the Swiss cheese on that platter." Veronica came back into the room and began picking up Mrs. Crayford's boxes. "It's all right. You stay there, Celia. I can manage." She saw the expression on Celia's face and smiled. Her voice dropped to a whisper. "I know--awful." "What does a Chironian computer print when you attempt illegal access?" one of them asked Colman when they had got into their joke repertoires. "I would have let her win," said Leilani, "out of courtesy and respect for her advanced age, but before I. The major met his eye firmly. "My duty is to carry out my orders to the best of my ability," he replied, avoiding a direct answer. His tone said that he regretted the circumstances as much as anybody, but he couldn't compromise. Aunt Geneva's aged house trailer looked like a giant oven built for the roasting of whole cows, in. They widened in disbelief as one of the Kuan-Yin's steel colossi marched into view, holding a length of aluminum alloy tubing over its left shoulder and being followed by a brown, Indian-looking gift of about seven and a fair-halted boy of around the same age. Colman grinned and stroked her hair. "You're right. So what do you want to hear about?" "I don't know," Bernard said dubiously. "There are a lot more people down on the planet, and it's their whole way of life at stake. Maybe they wouldn't. Who knows exactly how the Chironians think when all the chips are down? "You don't own me!".Then gunfire.."What made you sign up for the trip?".But Lesley was not listening as he gazed down at the platform below, which fanned outward from the arc lights above the lock to become indistinct in the darkness of the antechamber. Figures - were moving slowly from the shadows by the transit tubes and freight rails, spread thinly at the back, but closing up as they converged with the lines of the platform. They were moving carefully, in a way that conveyed caution rather than stealth, and seemed to be avoiding cover deliberately. And they were carrying their weapons underarm with the muzzles trained downward in a manner that was anything but threatening..has taught you to think.
