

HANDBOOK OF DERMATOLOGY FOR THE USE OF STUDENTS

Lechat didn't respond immediately. Eve Verity elaborated. "For over three centuries we've been struggling to reconcile old ideas about the distribution of wealth with the new impact of high technology. The problem has always been that traditional conditioning processes for persuading people to accept the inevitability of finite resources get passed on from generation to generation as unquestioned conventional wisdoms until they start to look like absolute truths. Wealth was always something that had to be competed and fought for. When slaves and territory went out of style with technology becoming the main source of wealth, we continued to fight over it in the same way we'd always fought over everything else, and everybody thought that was inevitable and natural. They couldn't separate the old theories from the new facts." Eve took a sip from her wineglass, then continued, "But the Chironians never grew up with any of that brainwashing. They made a clean start with science and advanced technologies all around them and taken for granted, and they understand that new technologies create new resources ...without limit." For that was how they fought. They had watched while their opponents grew weaker by ones and twos, and they had waited for the remnants to turn upon one another and wear themselves down. Then the Chironians had moved..After a long silence Otto looked up. "Then I'm afraid we can offer no more." "I'm not sure why, but it's important. - . from the Chironians."..staggering and bewildered, as they ought to be, but instantly balanced and oriented, as though they have..Bernard stared at him in open disbelief. "You're not saying she'd simply back down? That's crazy!" "M32s," the robot said. "They've the enhanced fireselectors." -.The trunks of the Chironian trees were covered by rough overlapping plates that resembled reptilian scales more than bark, and the branches, clustered together high near the tops in a way reminiscent of Californian sequoias, curved outward and upward to support domed canopies .of foliage like the caps of gigantic mushrooms. The foliage was green at the bottoms of the domes but became progressively more yellow toward the tops, around which several furry, catsized, flying creatures were wheeling in slow, lazy circles and keeping up a constant chattering among themselves; "You wouldn't think so, but that yellow stuff up there isn't part of those trees at all," Jay said, gesturing. "Jeeves told me about it. It's a completely different species'--a kind of fern. Its spores lodge in the shoots when the trees are just sprouting, and then stay dormant for years while the trees grow and give them a free ride up to where the sunlight is. It invades the leaf-buds and feeds through the tree's vascular system."..chemicals: Scores of mammoth rigs, headlights doused but cab-roof lights and marker lights colorfully..Other days, she might lie here smiling, eyes shining with amusement, occasionally issuing a soft murmur..The boy is reminded of home, which he will most likely never see again. "You said you've only got until your next birthday, and then all bets are off."..Five minutes later Swley and Malloy had gone into conference in a corner with Celia and Lechat, and Colman stood apart with Sirocco and Hanlon, discussing tactical details. "We might have enough now to put a demolition squad outside to take out the Battle Module drive section like Carson suggested," Hanlon said. "We're through, really,' she said. "Shall we carry on and see the town?" "It's a thought," Wellesley agreed distantly. He cast his eyes round the table. "Does anybody have a better idea?" Nobody did. "So let's get Merrick here and talk to him," Wellesley said. He sat back and placed his hands on the edge of the table. "This would be a good time to break for lunch. Scribe, adjourn the session here. We will reconvene in ninety minutes. Contact Leighton Merrick in Engineering, and have him join us then. Also ask him to bring with him two of his more capable officers. Advise me at once if there are any difficulties. That's all." - "That's only the first door," Swley reminded him, lowering the instrument from his eyes. "There are two of them. Whatever we do to that one won't stop them from closing the second one." "I don't know. It depends on the situation. Maybe. That's something else we'll have to leave to Sirocco to decide." The first message to the Chironians arrived when the oldest were in their ninth year, which was when the response had arrived from Earth to the Kuan-yin's original signal. Contact had continued ever since with the same built-in nine-year turn-round factor. The Mayflower II, however, was now only ten light-days from Chiron and

She had appointed herself guardian of Micky's sobriety..Although Jean felt sympathy for the soldier, the course that Kalens seemed to be advocating, with its prospect of more trouble and, inevitably, more killing, worried her even more. Why did it always have to be like this? she asked herself. All she wanted was to feel comfortable and secure, and to watch her children grow up to become decent, respectable, responsible adults who would weave themselves into the reassuring cocoon of familiarity around her-as much for their own future well-being as for hers. That much was hers to expect as her due because she had made sacrifices to earn it. It threatened nobody. Terran laws were proclaimed to be in force within, and the unauthorized carrying of weapons was prohibited, all permanent residents were required to register; all persons duly registered and above voting age were entitled to participate in the democratic process, thus conferring upon the Chironians the right to choose the leaders they didn't want, and an obligation to accept the ones they ended up with anyway.. "Yes, I was about to come to that," Sirocco replied. He lifted his head a fraction to address the whole room again. "As Velarini says, they could come in through the Battle Module and the nose. The Battle Module is the main problem. It's bound to be the most strongly defended section anywhere, and there's only one way through to it from the rest of the ship. Therefore we assault it directly only if all else fails. We've put Steve up near the nose of the Spindle with the strongest section to block that access route. Lechat frowned and seemed about to object. Then he thought some more about it and, in the end, sighed, showed his empty palms, and nodded. Bernard turned back to Jay. "Okay, see what you can do. If you do find him, ask him to get over here as soon as he can make it.".Sincerely, he said, "Damn, you would have been a funny Minnie." "You're probably just like my dad..The other two followed his gaze to a Chironian wearing coveralls and a green hat with a red feather in it, painting the lower part of a wall of one of the houses. Near him was a machine on legs, a clutter of containers, valves, and tubes at one end, bristling with drills, saws, and miscellaneous attachments at the other. A ground vehicle with a multisectioned extensible arm supporting a work platform was parked in front; and from a few yards to one side of the painter, a paint-smearing robot, looking very much like an inexperienced apprentice, watched him studiously. The Chironian was as old as any that Colman had seen, with a brown, weathered face, but what intrigued Colman even more was the house itself, which was built after the pattern of dwellings on Earth a hundred years earlier--constructed from real wood, and coated with paint. It was not the first such anachronism that he had seen in. Franklin, where designs three centuries old coexisted quite happily alongside maglev ears and genetically modified plants, but he hadn't had an opportunity to stop and study one before.. "He's been all over television," Leilani said.. "He will. He doesn't like people much, unless they're dead. "You don't own me!".Sirocco resumed twiddling his moustache. "Besides, I couldn't let you have the monopoly, could I-on all the decent ones, I mean." He was giving Colman a strange look, as if he was trying to find out about something that he didn't want to put into words..Colman nodded to himself and wiped his mouth with a napkin from the dispenser on the table while he tried to form the right answer. He was stuck in the Army but wanted to become a professional engineer; Jay could walk into being an engineer but thought he wanted to be in the Army. There would be no point in being scornful and listing all the reasons why it might not be such a good idea-Jay knew all those and didn't want to hear about it.. "When did you see a shoddy piece of workmanship on Chiron a door that didn't fit, or a motor that wouldn't start?" Eve asked him. "Have you ever come across anything like that anywhere there? It makes what we're used

to look like junk. I was at a trade show yesterday that some of our companies put on in Franklin to do some market research. The Chironians thought it was a joke. You should have seen the kids down there. They thought our ideas of design and manufacturing were hilarious. Our guys had to give it up as a dead loss." but fear for her one good hand caused her to choose the nether end..fiends..enough to drink ought to be ashamed..the tattoo snake. "At least take a look at his peace offering." To stave off more tears, Micky said, "That's sweet, Aunt Gen, but everything you have doesn't amount.wasn't in view, but that didn't mean she wasn't present. By this hour, old Sinsemilla would have been." As long as you think of me as a handicapped waif, your pity doesn't allow you to be impolite. "I didn't think it would, so I won't say it." Colman shook his head slowly. There had been too much to think about in too little time. It was always the same; whenever the pressure was at its highest, there was invariably one thing that everybody missed because it was too obvious. They had all been so preoccupied with thinking of how to stop Stern from getting into the Battle Module that none of them had allowed for the obvious possibility of his being there already..Colman looked unconsciously toward Kath for her opinion..Unprepared for the girl's admission, Micky stumbled a few words further. " ? because you . . . because.truck-stop parking lot. Cars and pickups and SUVs and a few RVs nearly as big as this one careen." Vice Admiral Crayford calling from Vandenberg now, sir," a voice called out..Stern looked displeased at the response. "Securing your planet against an aggressor is not to be confused with harboring ambitions of conquest," he replied.
