"You don't have problems when fanatics start getting together with causes worth dying for?" Jay asked..He started to grin automatically. "That's a nice thought, ma'am, but we're under orders and have to stay here. We appreciate it though." And then he frowned. It was happening again. She knew damn well they had to stay there.. "So it could take a while," Colman said.. "Curtis, you.Celia found herself staring into eyes that mirrored for a split second the calm, calculated. ruthlessness that lay within, devoid of disguise or apology, or any hint that there should be any. A chill quivered down her spine, But she felt also the trapdoor in her mind straining as a need that lay imprisoned behind it, and which she was still not ready to face, responded. Stern's eyes were challenging her to deny anything that he had said. She was unable to make even that gesture..Bernard looked from Kath, to Colman, to Jay, and then back to Colman. He was beaten, and he knew it. But after Kath's cryptic statement, he wasn't inclined to argue too much. "Hell, it's not so bad. He doesn't need anyone to stop him from getting shot," he replied. Beside him, Jay's face dropped. Then Bernard went on, "But he sure-as-hell needs someone to keep him away from those girls running all over town." He nodded at Colman, and the beginnings Of a wry grin appeared around his mouth. "Keep a good eye on him, Steve. He's crafty." He turned his head and stared resignedly at his son. "And you," he grunted. "Get home on time, and don't say anything about this to your mother..Just then Jerry Pernak came around a comer accompanied by his fianc?, Eve Verritty, and two more Chironians. A cart was following them with a few odds and ends inside. He gaped at Bernard and Jay in surprise, then grinned. "Hey! So Jay dragged you out to see the sights, eh? Hello, Jay. Started making friends already?" Introductions were exchanged with smiles and handshakes. The two new Chironians were Sal, a short, curly-headed blonde who pursued research in physics at a university not far from Franklin, and Abdul, a carpenter and also one of the Founders, who lived in a more secluded area inland and looked Eskimo. Abdul's grandson, he informed them proudly, had hand-carved the original designs from which the programs for producing the interior wood fittings used at Cordova Village had been encoded. He was delighted when Bemard praised their quality and promised to tell his grandson what the Terran had said..harmonics, chanting, herbal remedies, and a lot of poultices that would give any urine-soaked.. "No," Micky said. "Cops haven't had one lead in eighteen years..Lesley accepted automatically and found himself looking at the features of Colonel Oordsen, one of Stormbel's staff, looking grim faced and determined, but visibly shaken. "Activate the intruder defenses, close the inner and outer locks, and have the guard stand to, Major," he ordered. "Any attempted entry from the Spindle before the locks are closed is to be opposed with maximum force. Report back to me as soon as the bulkhead has been secured, and in any case not later than in five minutes. Is that understood?".January 9, 2081.listen with your heart..either adventure or a share of the juice..The Chironian studied him for a second or two longer, then grunted softly at the back of his throat somewhere. "We didn't do that," he said. "After we told 'em they were cooped up, some of 'em started shooting. Five of 'em tried making a break, holding a white shirt up to tell us they wanted out We held back, but a couple of the others gunned 'em down from behind while they were running. She was one of those five." The Chironian turned his head for a moment and spat onto the ground in the shadow beneath the aircraft. "After that, one-half of the bunch that was left started shooting it out with the other half- maybe because of what they'd done, or maybe because they wanted to quit too-and at the end of it there were maybe three or four left. We hadn't done a thing. Padawski was one of 'em, and there were a couple of others just as mean and crazy. Didn't leave us with too much of a problem..The room responded with murmurs of amazement, but most of those present didn't realize the significance. Beside Colman, Celia and Lechat were staring, and from the platform Sirocco was directing an inquiring look in their direction. Celia turned her head to look at Colman. "I don't believe this," she whispered. "Who is that corporal?.maraschino cherries. Wendy was bringing a bedtime treat to her trouble-plagued wards..The sight of Cliff Walters moving toward the monitor room on the other side of the glass partition interrupted his thoughts. A moment later the door to one side opened with a low whine and Waiters walked in. Fallows swung his chair round to face him and looked up in surprise. "Hi. You're early. Still forty minutes to go..Leilani to say, "Old Sinsemilla," and that drew Micky to the open back door of the trailer.. Instead, they shook. Her grip was firm. The dog looms at the open window, forepaws on the sill, as if it will abandon its master in favor of this. Nanook shifted his eyes and shook his head again. "A lot of people around here seem to accept her as... boss..distances..battery eventually dies..York City Ballet, considering her options as she rotates. Then she sprints around the front of a nearby." "Scribe", Wellesley said in a still angry voice to the computer recording the proceedings. "Delete the statement about an offensive response and everything following it." Howard Kalens simmered as he listened. Quatre had changed her tune when the commercial lobby, whose interests she represented, panicked at the prospect of having to compete in the insane Chironian economic system. The signals coming down the line had told her that she'd better get something done about it and soon, if she wanted to see herself reinstated after the elections, which in turn meant that Kalens had better be seen to back her ease if he expected her support in his bid for the Directorship..he'll have a lifetime for anguish, loss, and loneliness..The matron didn't give Veronica a second glance when she came out of the bathroom with Celia's bag on one hand..even once, were they, Michelina?". "Oh, so it's trouble them fellas is looking for, is it?" a voice with just a hint :of an Irish brogue asked softly from the doorway. Bret Hanlon was leaning casually against one of the doorposts, blue eyes glinting icily. His huge shoulders seeming almost to reach the other side of the door. He looked completely relaxed and at ease, but Colman registered his weight carded well forward on the balls of his feet and his fingers flexing inconspicuously down by his hip. The two corporals glanced at each other apprehensively. Hanlon's appearance altered the odds a bit. Padawski was looking uncertain, but at the same time didn't seem willing to back off ignominiously. For a few seconds that dragged like minutes, the charge in the room crackled at flashpoint. Nobody moved.. "My pleasure.."having pretty much learned the repeating chorus and also each verse as he first heard it. Ghost riders in. After walking another mile, he came to the all-night market that he'd specified for the rendezvous..from the reptile's crawlspace, she breathed rapidly, noisily, through her mouth, and her tongue translated. "He ought to be given a chance to go and look at it," Borftein agreed with a nod. "What would be the best way to arrange something like that?". CHAPTER THREE. "A good try, Wellesley," Stern said from the large screen. "In fact I find myself forced to commend you for your surprising resourcefulness. Unfortunately from your point of view, however, we now see it was in vain." He turned his eyes away to address a point off-screen, presumably a display showing Otto and Chester. "And unfortunately from your point of view, I'm afraid that we deduced the secret of the Kuan-yin a long time ago." at the shuttle base. Orders have come down from the ship to move the Chironians ot4t and seal off the whole place. Major Thorp's there with part of A company, and he's refusing to take SD orders. We've been ordered to send two platoons. Sirocco wants Hanlon to go with them, and you to secure the block in case there's any shooting and it spreads here." "It could be worse, I guess," the girl said with a calculated jauntiness. "He could be a bad dresser. A." "What do you think of that theory, Mrs. D?" Leilani asked with little of her usual humor, but with a quiet. "What else can you do?" Juanita asked..called me Leilani, which means 'heavenly flower,' because maybe . . . maybe people will think of me as. Colman nodded. "I guess so. I'll probably be asleep when you come off duty. Better give me a call." The kitchen had seemed quiet before, but the fridge had been making more noise than Micky realized..And for such a system the universal law was not death, but life.. "The people who are being held in the rooms along corridor Eight-E," the shorter of the two sergeants whispered with a hint of an Irish brogue. "You take their food in?" The steward gulped and nodded vigorously. "When is the evening meal due?". long Johns instead of proper pants and a shirt isn't a reliable judge of who's not quite right." Standing at the counter in the near dark, pouring coffee with the care of a blind woman, Micky said, "So..have been more complete..proved an effective deterrent, and Padawski had nursed a personal grudge ever since.. "Hey, you haven't asked me," Chang said. "I beat that." Colman nodded. "Her friends showed up, and she's in Franklin. It all went fine." He turned his head to Celia. "This is Bret. He got Veronica off the base." The plasma emerged from this primary process with sufficient residual energy to provide high-quality heat for supplying a hydrogen-extraction plant, where seawater was "cracked" thermally to yield bases for a whole range of liquid synthetic fuels, a primary-metals extraction and processing sub complex, a chemical-manufacturing sub complex, and a desalination plant which was still not operational, but anticipated large-scale irrigation projects farther inland in years to come..The assistant's patience snapped at last. "This is ridiculous! I want to know who is in overall authority here. You must have a Director of Operations or some equivalent. Please be kind enough to--". "Junk?!" Hoover's lights blazed crimson in unison. "What do you mean, funk? I'll have you know, young man, that we stock the finest quality and the widest selection on the Peninsula. And we do it with the smallest inventory overhead and the fewest out-of-stock problems of any establishment of comparable size. Junk indeed! Have you troubled to inspect our--". "How do you know?" Jean challenged. "You weren't there. And that's not the way it sounded when Kalens was talking just now. And a lot of people seemed to agree with him." Anita asked. "Yeah. This is Jay. He's okay... and smart." "It could open up possibilities that'll blow your mind," Pernak resumed. "Suppose, for instance, that we could

get to understand those laws and create our own concentrations on a miniature scale to inject energy from let's call it a hyperrealm, into our own universe--in other words make 'small bangs'--mini white holes. Think what an energy source that would be. it'd made fusion look like a firecracker." Pernak waved his hands about. "And how about this, Jay. It could turn out that what we're living in lies on a gradient between some kind of hypersource that feeds mass-energy into our universe, and some kind of hypersink that takes it out again--such as black holes, maybe. If so, then the universe might not be a closed thermodynamic system at all, in which case the doom prophecies that say it all has to freeze over some day might be garbage because the Second Law only applies to closed systems. In other words we might find we're flame people living in a match factory." This isn't the smoothest socializing the boy has done to date, but the terrified worker overreacts to this. There didn't seem to be any concept of rank or status here. Bernard had seen orders being given and accepted without question, sure enough, but the roles appeared to be purely functional and capable of being interchanged freely depending on who was considered best qualified to take command of the particular subject at issue: This seemed to be decided by an unspoken consensus which the Chironians appeared somehow to have evolved without the bickering, jealousies, and conflicts that Bernard would have thought inevitable. Then her sigh vented volumes of searching, cunning and indefatigable.. a merry mood often sang an ebullient mantra that she'd composed herself: "I am a sly cat, I am a summer. "I did." A silence descended like steel doors slamming down around the room. Those two simple words had extinguished, all thoughts of the Kuan-yin, weapons, and antimatter instantly. Every head turned disbelievingly to Celia as she sat staring ahead. Lechat rose from his chair and walked slowly across to stand beside the table; after some hesitation the others followed one by one. Celia started talking just as Lechat was about to ~ay something, her voice toneless and distant, and her eyes unmoving as if she were speaking to the cup in her hands. "I couldn't have spent my life with a man who had closed his mind to reality. You can't know what it was like. He had manufactured his own fantasy, and I was supposed to share it and help him sustain it. It was impossible." She paused to gulp some of the coffee. "I m not sure I even know what's happened," Borftein said. "It's been too sudden. Just what do you think you're going to do?" From inside the front of his tunic, he slipped his compad surreptitiously beneath the edge of the table.
