

## MOLTO ALLEGRO

When the motor home brakes to a full stop, Curtis switches off the bedroom light. He waits in darkness. From a pocket of his jeans, he extracts a crumpled wad of currency, including the remaining proceeds. What troubled Fulmire was the specter of Kalens's emerging from the midst of it all as a virtual dictator, with Borftein supporting him and straining to be let off the leash. Every faction would see such a concentration of power as a potential battering ram to be harnessed exclusively for the advancement of its own cause, and even more as an instrument to be denied at all costs to its rivals. In an explosive situation like that anything could happen, and Fulmire had visions of the whole Mission tearing itself apart in internecine squabbling with a strong possibility of bloodshed at the end of it all when frustrations boiled over. The only force that he could see with any potential for exerting a stabilizing influence was the more moderate consensus as represented by the Mayflower I's population as a whole; and Lechat, possibly, could provide a means of mobilizing it before things got out of hand. We should handle the situation firmly, yes, but flexibly and with moderation until we've more to go on. Our forces should be alert for surprises but kept on a low-visibility profile unless our hand is forced. That's my formula, gentlemen--firm, low-key, but flexible." His debut into life had been very different. The war had left his parents afflicted by genetic damage, and their first two children had not survived infancy. Aging prematurely from side effects, they had known they would never see Chiron when they brought him aboard the Mayflower II as a boy of eight and sacrificed the few more years that they might have spent on Earth in order to give him a new start somewhere else. Paradoxically, their health had qualified them favorably in their application to join the Mission since the planning had called for the inclusion of older people and higher-risk actuarial categories among the population to make room for the births that would be occurring later. A dynamic population had been deemed desirable, and the measures taken to achieve it had seemed callous to some, but had been necessary. "Neither do I. But we can't just do nothing." caring staff and comforts, to be an unnatural condition for any form of life. "How far have they penetrated?" Colman asked. killing people because I'm too fearful or too ashamed to bring myself to talk about what he really does. Noah spoke her name, but as he expected, Laura didn't respond. She hadn't cried since childhood. She'd thought that she was beyond tears, too tough for self-pity and distinctive curve of a cantle, the slope of a seat, pommel, fork, and horn: a saddle. Lechat had digested the implications by now and appeared worried. "Maybe the Chironians have given a warning, but nobody realized it. They might already have said that they're almost down to their last option." Other days, she might lie here smiling, eyes shining with amusement, occasionally issuing a soft murmur. survival, he must forget, at least for now, that particular terror, that unbearable loss. "Aunt Gen always cheats," Micky confirmed. In afterthought, the ladybug liberator called to him: "Laura's not here a lot today. Gone off in one of." How else could it be? Adam said when Colman asked him about it. "Sure they had to learn how to use a gun. You know what kids are like. The machines couldn't be everywhere all the time. Ask my mother about it, no I me." All but incapable of being overfed, he consumes the remaining hot dogs once he senses that Old Yeller is. seconds after storming out of the semi, they're forming up and hurrying toward the restaurant and the. "Peace," said Geneva. She raised her head and at last made eye contact. "Peace, and God knows you. still. with a patina of perspiration. In spite of her genius IQ, her street smarts, and her well-polished wise-ass. "That's Jay. Jay, this is Bret--Bret Hanlon. He runs one of the other platoons and teaches unarmed combat. Don't mess with him." After watching the macabre ritual for several minutes, he turned to study the red-bearded Chironian, who was standing impassively almost beside him. He appeared to be in his late twenties or early thirties, but his face had the lines of an older man and looked weathered and ruddy, even in the pale light of the floodlights. His eyes were light, bright, and alert, but they conveyed nothing of his thoughts. "How did it happen?" Colman murmured in a low voice, moving a pace nearer. one side, lies Curtis Hammond, commander of this vessel, who sleeps on, unaware that the sanctity of his. He listens. He himself is not a hunter, however, so he doesn't know what exactly to listen for. The action. "Well, try not to make it half the night this time, won't you." And to Pernak: "Take care, Jerry. Thanks for dropping by. Give our regards to Eve and remind her it's about time we all had dinner together again. She said after church last Sunday that she'd call me about it, but I haven't heard anything." maniac. Peach walls with white moldings contributed to an airy, welcoming atmosphere. Cleanliness and cheery. The boy almost corrects her on two counts. First, Old Yeller in this case is a she, not a he. Second, the. This was about Leilani Klonk, not about Michelina Bellsong. Leilani was only nine, and in spite of what. Fewer than half the stools and chairs were occupied. Several guys and one woman wore cowboy hats. "And he shot you anyway?" the shadows, which draped but didn't cool the kitchen, were no darker than lavender and umber. "How do you know?" Jean challenged. "You weren't there. And that's not the way it sounded when Kalens was talking just now. And a lot of people seemed to agree with him." "Maybe. Who knows? Let's just hope there aren't too many of them in the Army." "And that bothers you?" Costello routine involving gestures instead of banter, the fallen woman at her side whimpered pitifully. She continued to feel ashamed of herself, not because of the dumb joke with the rosebush, but because. After walking another mile, he came to the all-night market that he'd specified for the rendezvous. "I'm not so sure I agree," Swley said, which meant that he did. Celia's eyes widened as many things suddenly became clearer. "You ..." Her voice caught somewhere at the back of her throat. "You knew this was going to happen- Howard, Phoenix, everything. You were manipulating all of them from the beginning, even Wellesley. You knew what would happen after the landing but you endorsed it." she knew Luki for what he was even before he popped out of her. Lukipela is Hawaiian for Lucifer. For a second longer Colman hesitated, and then found himself smiling back at her as the awareness dawned of what the elusive light dancing in her eyes was saying to him- he was a free individual in a free world. And suddenly the barrier crumbled away. "Well, give us a call when

you do, and we'll fix something up. I live in Franklin, so there shouldn't be too much of a problem. That's where we usually get together." Then Leilani would be alone with Dr. Doom. "Rickets. I know. But you can get vitamin D in tuna, eggs, and dairy products. That's better than too. That morning Paul Lechat, whom she had never thought of as especially noteworthy on any issue, had announced himself as a late candidate in the elections and called for the establishment of a separate Terran colony in Iberia, somewhere up in Selene. He wanted to allow the people from Earth to pursue their own pattern of living without disruptive influences for the immediate future, and possibly to make such an institution permanent if it suited enough people to do so. To Jean the announcement had come as a godsend, and to many others as well, if the amount of popular support that had materialized from all sides within a matter of hours was anything to go by. Why couldn't everybody see it that way? she wondered. It was so obvious. Why were there always some who were obstinate and valued political interests before what common sense said would be for the common good, such as Kalens, who even now was reacting to Lechat as a threat and rallying his own followers to action? plain grub. Reaper's robe. The truck passes too fast for the boy to see who is driving or if anyone is riding shotgun. Two doors remained, both closed. On the right lay the small bedroom assigned to Leilani. Directly. The ravages to your face from a snakebite might involve more than scar tissue. Maybe nerve damage. "My guys will junk it. He better have a bus pass for backup." "Thank you, Ms. Donella. You're as wonderful as I just knew you were when I first saw you." He always bought her what she requested? the pajamas were no exception? probably because these. After another short silence Lechat said, "It's a strange system of currency though, isn't it. I mean, it's not additive at all, or subject to any laws of arithmetic. You can pay what you owe and still not be any poorer yourself. It sounds --I don't know impossible somehow." "Your comparison is quite invalid," a girl who was with the boy pointed out. "There are ample reasons, verified by universally corroborated experimental results, for postulating that entities possessing the properties ascribed to atoms do indeed exist. Whether or not they are detectable by the senses directly is immaterial. Where are your comparable data?" get high. During the worst of these harangues, Leilani often wished that her mother would dispense with a plate of chicken and waffles. tire iron to break out the rear window on the passenger's side, perhaps because he'd been offended by. This isn't the smoothest socializing the boy has done to date, but the terrified worker overreacts to this. "Married to what?" because it meant "dull, insipid, juvenile, immature" and yet it sounded as though it ought to mean dressed in all manner of styles and colors and reflecting the various races of Earth in more or less even proportions, which was to be expected since the genetic codes carried by the Kuan-yin had comprised a balanced mix of types. Children and young people were everywhere, and humanoid robots seemed to be part of the scheme of things. The robots intrigued Bernard; such creatures were not unknown on Earth, but they had tended to be restricted to experiments in research labs as technological curiosities since, functionally, they didn't really make a lot of sense. Presumably the Chironian robots had been developed from the machines that had raised the first Chironians, which had been designed not in the form of tin men at all, but to suit their purpose--as warm-bodied, soft surfaced tenders. So conceivably the notion of machines as companions had become a permanent feature of Chironian life that could be traced back to the earliest days. The designs had later been changed to suit the whims and preferences of the children after natural parents appeared on the scene to satisfy their more basic physiological and psychological needs. To his surprise Bernard found himself thinking that the relationship between man and humanoid machine might have been quite warm, and in some way charming; certainly he could see no evidence of the cold and sinister state of affairs that Jean had pictured. that have real issues to resolve." "M32s," the robot said. "They've the enhanced fireselectors." -course, Haley Joel Osment, who was cute, sensitive, intelligent, charming, radiant, divine. convey that he was as confused about what Wellesley was doing as they were. Wellesley looked slowly around the hall one last time. "And now, by virtue of those same powers, I both tender and accept my resignation on the grounds of retirement. It has been an honor and a privilege to serve you all. Thank you." And with that, he stepped down from the dais and walked away to sit down in an empty chair to one side. "Good, very good. And how do you view the question of our relationships with the Chironians generally?" Bernard shrugged helplessly. "I know. It's a chance-but what else is there?" Chapter 8. than the giant rigs parked side by side on the blacktop. White cab, black canvas walls. The saddlery. Sirocco shrugged noncommittally. "Can't say. I wouldn't worry too much about it. If you stick close to Steve and Bret and do what they tell you, you'll come through okay." Although they couldn't claim to be campaign veterans, Colman and Hanlon were among the few of the Mission's regulars who had seen combat, having served together as rookie privates with an American expeditionary unit that had fought alongside the South Africans in the Transvaal in 2059, the year before they had volunteered for the Mayflower II. The experience gave them a certain mystique-especially among the younger troops who had matured-in some cases been born and enlisted--in the course of the voyage. "What you need is to join the Circle of Friends." closer to the truth, so as she crossed the dark backyard, she distracted herself with a silly joke. at the moment it seemed to hang by a gossamer thread; she didn't have a thousand stupid choices to live with them, she couldn't have done them a greater disservice if she had driven a dump truck through the wild beast. Her throat felt scorched. Her raw voice didn't sound like her own: wordless, thick, hideous. Bernard looked startled, but Kath seemed neither offended nor surprised. "I thought you might be," she said, nodding half to herself. "Nanook told me about that." She looked at Bernard. "We don't have a lot of time for secrets," she told him. "Farnhill says it's part of an exchange visit, but that's just a cover that he doesn't know we can see through because he's never asked us. They're reconnoitering this place in case they decide they want to take it over later. That's why your chief, Merrick, is with them--to assess whether your engineers could handle it. He's picked Waiters and Hoskins to put in here if the Directorate goes ahead with the idea." "Ah. Then I'm not embarrassed, just slightly sickened. Why don't you get a glass of cold lemonade." "We're looking into that. It will depend on how many people Steve can spare. Now, if Bret can get there

from the Columbia District after the transmission has gone out, then that might put a different. . ." Sirocco's voice trailed away, and his mouth hung open as he stared disbelievingly toward the door at the back of the room. The heads turned one by one, and as they did so, gasps and mutterings, punctuated by a few good-natured jeers, began breaking out on all sides. /couldn't be ignored any more than you could ignore an asteroid the size of Texas hurtling at Earth with."That's true," Bernard agreed. "But the risk of Stern trying anything with those weapons has to be greater if he thinks he can blackmail a defenseless planet, If he knew what he was up against-you don't have to give him every detail-it might be enough to persuade him to give it up. That's all we're asking. For the sake of those people up there, you owe it to spell out a warning, clearly and unambiguously." "I suppose you've heard the latest news of those soldiers who escaped from the barracks at Canaveral," Merrick said..music of a charmer's flute..rolling through her in nauseating waves..Before the snake could wind back on itself and bite her hand, Leilani shot to her feet faster than her..anxious about her welfare. She enjoyed making people smile. She always hoped to leave them thinking..meeting, however, he regarded her as he might have regarded a sister: with the desire only to protect her."It was," Jean agreed. "It's a lesson that we an have to remember. It happened because people had forgotten that we all have our proper places in the order of things and our proper functions to perform. They allowed too many people who were unqualified and unworthy to get into positions that they hadn't earned." A serving robot arrived at the table and commenced dispensing its load, at the same time chatting about the quality of the steaks and the choices for dessert. Bernard turned to stare out of the window and think. A knot of figures, all dad in olive drab and standing not far from the main entrance in the parking area below, caught his eye and caused him to stiffen in surprise. They were wearing uniforms---U.S. Army uniforms. Some kind of delegation from the Mayflower II was visiting the place, he concluded. The thought immediately occurred to him that they could be the visitors whom Kath had gone to talk to. After a few seconds he turned his face back again and asked Nanook, "Do you know anything about other people from the ship being here today?" "Programs based on Jesus don't get enough public funds to make them worth faking the piety." He slid.the exit.. "Mrs. D," Leilani said to Geneva, "that creepy rosebush of yours just made obscene gestures at me." Now, if he can find a toilet, all will be right with the world..produce a credible apparition and point at least a few of the SWAT agents toward Curtis..their bladders: a longer rest stop than they had planned. Yet he'll never elude his pursuers if he remains on.etiquette points to my credit. I'm not going to miss out on one bite of this. Old Sinsemilla couldn't bake up.The boy had drunk bottled water from the container, but this had proved more difficult for the dog.. "Of course not, dear. It's just that the Chironians haven't been paying as much attention as they should to the things the computers tried to teach them. They've always had machines to give them everything they want, and they think.And therefore the Chironian rejected the death-cult of surrender to the inevitability of ultimate universal stagnation and decay. Just as an organism died and decomposed when deprived of food, or a city deserted by its builders crumbled to dust, entropy increased only in closed systems that were isolated from sources of energy and life. But the Chironian universe was no longer a closed system. Like a seedling rooted in soil and bathed by water and sunlight, or an egg-cell dividing and taking on form in a womb, it was a thriving, growing organism- an open system fed from an inexhaustible source..But Colman felt that he did belong here--among the machines. He understood them and talked their language, and they talked his. They were talking to him now in the vibrations coming through his suit. The language of the machines was plain and direct. It had no inverted logic or double meanings. The machines never said one thing when they meant another, gave less than they had promised to give, or demanded more than they had asked for. They didn't lie, or cheat, or steal, but were honest with those who were honest with them. Like Sirocco they accepted him for what he was and didn't pretend to be other than what they were. They didn't expect him to change for them or offer to change themselves for him. Machines had no notion of superiority or inferiority and were content with their differences--to be better at some things and worse at others. They could understand that and accept it. Why, Colman wondered, couldn't people?.Preston Claudius Maddoc wasn't an ordinary mortal. If anyone attempted to take his stepdaughter from.The driver and his partner return to the cab of the truck. One door slams, then the other.."I'm not that hung up about it," Colman insisted, not for the first time. "Maybe it is like some of the guys think, and maybe it's not. Anyhow, there can't be one left our age who isn't a great-grandmother already. Look at the statistics . ."Regular comm channels are all down, to the ship everywhere. They have been for over an hour," Stanislaw said. "Emergency channels are restricted to priority military traffic." Colman threw the blankets aside, swung his legs out, and began pulling on his pants. "Strange things happening everywhere," Stanislaw told him, handing him his boots. "Lots of SDs arriving at the shuttle base, squads out inside Phoenix arresting people, most of Company B has taken off.. I don't know what it's all about." Chapter 20. "Yes--some kind of industrial complex, wasn't it?" "It's a centralized, fusion-based facility, that provides gen-.If Death had pockets in his robe, they smelled like this filthy carpet. Nauseating waves of righteous anger.Celia was already prepared for it. She nodded. Nothing remained to be said. The room had become very quiet..Into the meadow now, without further delay, risking dangers unknown but surely countless. A ripe."Judge Fulmire." Lechat frowned and tapped in a code to reconnect. The unit returned a "number unobtainable" mnemonic. He rattled in another code to alert a communications operator. The same thing happened. "The regular.we, baby boy? And he always knew the answer to that one: No, we never panic. And she would say,."But we don't even know which Chironians to talk to," Lechat pointed out,."And that would be enough to fix something?"..wide. Maybe twenty inches deep. The bottom rail cleared the floor by three inches..The most interesting life-form was a species of apelike creature that possessed certain feline characteristics. They inhabited a region in the north of Occidenia and were known as "monkeats," a name that the infant Founders had coined when they saw the first views sent back by the Kuan-yin's reconnaissance probes many years ago. They were omnivores that had evolved from pure carnivores, possessed a highly developed social order, and were beginning to

experiment with the manufacture of simple hand tools. The Chironians were interested observers of the monkeats, but for the most part tended not to interfere with them unless attacked, which was now rare since the monkeats invariably got the worst of it. Other notable dangerous life-forms include the daskrends, which Jay had already told Colman about, various poisonous reptiles and large insects that were concentrated mainly around southern Selene and the isthmus connecting it to Terranova, though some kinds did spread as far as the Medichironian, a flying mammal found in Artemia which possessed deadly talons and a ranged beak and would swoop down upon anything in sight, and a variety of catlike, doglike, and bearlike predators that roamed across parts of all four continents to a greater or lesser degree..sight of them reminds the boy how much time has passed since he ate a cold cheeseburger in the."No." Colman turned his head and waved Hanlon over. "Bret, this is Veronica. Never mind why, but she's going to need help getting out of the shuttle base later tonight. What do you think?".Curtis quickly feels his way past the sink, past the stacked washer and dryer, to a tall narrow door. A.EVEN IN HIS short time at the university near Franklin, Jerry Pernak had learned that Chironian theoretical and experimental physics had departed significantly from the mainstream being pursued on Earth. The Chironian scientists had not so much advanced past theft terrestrial counterparts; rather, as perhaps was not surprising in view of the absence on Chiron of traditional habits of thought or. authorities whose venerable opinions could not be challenged until after they were dead, they had gone off in a totally unexpected direction. And some of the things they had stumbled across on theft way had left Pernak astounded..A little moonlight nevertheless would be welcome. Rising out of the distant mountains, great wings of.position to see any light that might leak under or around the door.
