

QUALITÄTSSICHERUNG DURCH MITARBEITERENTWICKLUNG BEI MANGELNDER QUALIFIKATION

Sterm was unperturbed, as if he had been expecting such an answer. "I made no mention of your wanting to save yourself physically. I have already pointed out that we are both realists, so there is no need for you to feel any obligation to pretend that you misunderstood." He paused as if to acknowledge her right to reply, but gave the impression that he didn't expect her to. She raised her glass to her lips and found that her hand was trembling slightly. Sterm resumed. "The dream has crumbled away, hasn't it, Celia. I know it, you know it, and a part of Howard's mind knows it deep down inside somewhere while the rest is going insane. You expected to share a world, but instead all you stand to share is a cell with a madman. The world is still out there but you cannot accept it as it is, and Howard will never be able to change it now." Sterm extended a hand expressively. "And the future awaits you." He paused again, watched as Celia lowered her eyes, and nodded. "Yes, I could persuade Wellesley to overrule the eviction orders, or arrange for Borftein to reinforce the Phoenix garrison, put SDs around the house so that you would never have need to fear for your safety. But is that what you want me to do?"

your head, just like in mine. You sort of hide it, but I can see." Leaning forward from the pillows, old Sinsemilla Cleopatra spoke with a smiling insistence that Leilani to stiffen your spine, work up some spit, open the damn door, go in there where the beast was, and you. As one, the customers exiting the building had been paralyzed in midflight by the arrival of this scowling. Sheltering against a weathered outcropping of rock, he wishes desperately that his mother were with. "So what will you do? Sirocco inquired, propping his feet back on the desk. "Figured it out yet?"

"So now," said Micky, "in addition to your perpetually wasted tofu-peaches-bean-sprouts mother and."

Leilani, honey, you're not going back there," Geneva declared. "We're not going to let you go back to."

Face to the sun, eyes closed, striving to empty her mind of all thought, yet troubled by insistent. Marcia Quarrey then raised the question of a separate governor, responsible to Wellesley, but physically based on the surface inside the enclave to administer its affairs. Perhaps the division of authority between the members of the Directorate sitting twenty thousand miles away in the ship had contributed to the difficulties experienced since planetfall, she suggested, and delegating it to one person who had the advantages of being on the spot would remedy a lot of defects. Opinions were in favor, and Quarrey nominated Deputy Director Sterm for the new office. Sterm, however, declined on the grounds that a large part of the job would involve policymaking connected with Terran-Chironian relationships, and since a Liaison Director existed to whom that responsibility was already entrusted, the sensible way to avoid possible conflicts was to unify the two functions, lie therefore nominated Howard Kalens; Quarrey seconded, and the vote was carried by a wide margin.

anger. Only anger had kept her going, and until recently she'd been reluctant to let it go.

Bernard acknowledged with a nod and leaned forward to speak in a low voice to the face that had appeared on an auxiliary screen. "This is urgent, Admiral. Make sure that all the sky-roof outer shutters are closed immediately."

Gripping the pole in her right hand as if it were a shepherd's staff, she used it to help maintain her balance. Driscoll grinned and began feeling more confident. "You see, Wellington," he said. "They're not all as bad as you think."

Brow dripping, face slick, body clammy: Leilani reeked of sour sweat, no heavenly flower now. On her. Jay drank some more of his coffee, stared at his cup in silence for what seemed a long time, then said without looking up, "I've been thinking on and off... you know, I think I'd like to get into the Army. What would be the best way of going about it?"

Her attempt at humor was a good sign. Colman grinned and heaved himself from his seat. "Then let's go," he grunted.

"So then ... do you think I'm 'not quite right'?" he asks, fiercely gripping the edge of the counter, still half.

The next part was going to be the trickiest. The information obtained by Stanislaw had confirmed that the outside entrances to the complex, which had already been bypassed, were the most strongly guarded, and the three inner access points to the Communications Center itself- the main foyer at the front, the rear lobby, and a side entrance used by the staff-were covered by less formidable, three-man security teams. The problem with these security teams lay not so much with the physical resistance they might offer, but with their ability to close the Communications Center's electrically operated, armored doors and raise the alarm at the first sign of anything suspicious, which would leave Sirocco's force shut with no hope of achieving their objective and facing the bleak prospect of either fighting it out or surrendering to the guard reinforcements that would show up within minutes. On the other hand, if Sirocco could get his people inside, the situation would be reversed.

"Are we to run and hide on the far side of the planet for fear of offending a disorganized and undisciplined race who owe us everything that they take for granted and waste freely as if nothing had any value or ever had to be earned?" Kalens was asking from the screen. "Whose sciences and labors conceived and built the Kuan-yin, and with it the very machines that created the prosperity of Chiron? Whose knowledge and skills, indeed, created the Chironian race itself, who would now lay claim to all around them as theirs and send us away like paupers from the feast that we have provided?" He paused a second for effect, and his face took on an indignant scowl below his crown of silver hair. "I say no! I will not be driven away in such fashion I will not even contemplate such an action. I say, publicly and without reservation, that any such suggestion can be described only as surrender to moral cowardice that is beneath contempt. Here we have come, after crossing four light-years of space, and here we will remain, to share in that which is our right to share, and to enjoy that

which is no more than our just due." A thunder of applause greeted the exhortation. Jean had heard enough and told Jeeves to turn off the screen. Micky sat at the table again. "Where did Lukipela disappear?" "Close up ranks," Sirocco said, and the guard detail shuffled forward to crush up close behind Sirocco, Colman, and Hanlon to make room for the officers and the diplomats to move up behind. Sirocco looked at the Dispatching Officer and nodded. "Open outer hatch." The Dispatching Officer keyed a command into a panel beside him, and the outer door of the shuttle swung slowly aside. "What about human beings crossed with wildly poisonous vipers?" Micky proposed. a plate of chicken and waffles. "Having risen from her knees as Sinsemilla whirled upright, Micky sidled toward the fence, reluctant to. The concrete floor, painted ruby-red, appeared to have been mopped at least a couple times since. Rinsing the dishes and the flatware, stacking them in the sink to be washed later, Micky said, "The Congress? sometimes he calls it the Parliament of Planets? and those plans will take time to carry out. pain by sharing it. because he's known that eventually, when he bonds better with the animal, he'll arrive at not just any. but the only time he ever slung his willy out of his pants was when he needed to take a leak." The roar of the long barrage has left his ears ringing. Yet in the aftermath, Curtis is able to hear people. enough to stop caring about helpless girls? the one next door and the one that she herself had been not. Jay looked uncomfortable and massaged the top of his forehead with his fingers. "I know you're not going to believe this, Ms," he said. "But they're not going to cost anything. Nothing seems to cost anything. I don't understand it either, but--". "I'm sorry, sir. He just went down to the lock." "That was unfortunate," Bernard agreed. "But in my opinion, sir, he asked for it." "Ninety-seven," Pernak replied. He looked at Eve and shook his head. The only thing trickier than an amateur using a psychologist's techniques was an amateur trying to. Padawski was glowering from a few feet away, and seemed to have regained some of his confidence now that the SD's were in control. "You stay away from her, Goldilocks," he spat. "Stick with your nice, murdering friends. We won't forget you either." I-Ic turned his head back to glare at the whole room before turning for the door. "And that goes for all of you," he warned in a louder voice. "We won't forget. You'll see." "Yes," Sal replied. "Forty years ago this was just a few domes and a shuttle port. The main base that you came in through was only built about ten years ago. Back in the early days, the Founders started changing the designs that had been programmed into the Kuan-yin's computers, and the machines did their best to comply." She sighed. "And this is what it ended up like. We could change it, of course, but most people seem to prefer it the way they've always known it. There 'were some ghastly mistakes at times, but at least it taught us to think things through properly early on in 'life. The other towns farther out are all more recent and a lot tidier, but they're all different in their own ways." "He's just playing on emotion, Jean. I had it on down here for a few minutes but couldn't stand it. All he's interested in is scoring a few points against Wellesley and stopping a run to Lechat. And all that stuff about the Chironians claiming everything is theirs-it's pure garbage! I mean, it couldn't be further from the truth, could it, but nobody stops to think." He frowned to himself for a moment. It was true that he hadn't been at The Two Moons, but he had called Colman early that morning and gotten what seemed like an honest account. But with Jean acting the way she was, he didn't want to mention that. "Anyhow, the facts about the shooting are on record," he said. "All you have to do is ask Jeeves." JAWS CRACKED WIDE as if unhinged, backward-hooked fangs exposed to their full wicked arc. Bernard raised his eyebrows. "Well, hello, Jeeves. How about all that? I guess you'd better stay who you are for the time being. How about giving us a rundown on this place for a start? For instance, how do you...". "Spunky though you are," Micky said as the second candle cloned the flame on her match. "I suspect. Colman kept a poker face. 'What made him think that?'. More saddles are braced among the blankets, some as smooth as the first, but others enhanced with chapel of her cupped hands. Across the room in the sunken area below the wall screen, Bernard, Lechat, Colman, and Jay resumed their conversation. "We don't know what they've got exactly, but it's pretty devastating," Jay told Colman. "We figure they've already tested it. There's an extra crater on one of the moons-a couple of hundred miles across-that wasn't there a year ago. Imagine if whatever did that was to hit the ship." weary in body, mind, and spirit. And her emotional unsteadiness scared her. If Preston Maddoc, alias Dr. Doom, was at home, his disinterest in his wife's extreme distress couldn't. "Would you feel better if I said I haven't figured it out yet either?" Stern's eyes took on a distant light, and his breathing quickened visibly. "I will build this world into the power that Earth could never be-an unconquerable fortress that even a fleet of EAF starships would never dare approach. straight in the air, and Leilani goes yikes! just about straight in the air herself, and then she's makin' for the. Instead of making eye contact, avoiding any approach that might seem like an inquisition, Micky. arrangement I was born with. She's pathetic, old Sinsemilla, not fearsome. Anyway, she is my mother. "They'd tell you modesty was a better virtue too," Colman said. "From what Jerry Pernak told us it must have to do with antimatter," Jay said. "The Chironians are into a whole new world of particle theory. That means they can produce lots of antimatter economically. With that they could make matter-antimatter annihilation bombs, superintense radiation sources, guided antimatter beams, maybe who knows? But it has to be something like that." "But eleven people? How could he?" He turned his head back to look at her. "Yes?" right. Then the jig would be up for our friends, the ETs. "And from Engineering there's a. . . Merrick--Leighton Merrick, that's right." She looked at Nanook. "And one called Walters. "Someone gave it to Aunt Geneva for nothing." his master's side. "Some human beings are mean enough without crocodile blood in their veins," Geneva said. gunship, surely armed with machine guns, possibly with rockets. The shriek of the engines vibrates. "The Chironians didn't kill Howard," Celia said. "I did." A silence descended like steel doors slamming down around the room.

Those two simple words had extinguished, all thoughts of the Kuan-yin, weapons, and antimatter instantly. Every head turned disbelievingly to Celia as she sat staring ahead. Lechat rose from his chair and walked slowly across to stand beside the table; after some hesitation the others followed one by one. Celia started talking just as Lechat was about to say something, her voice toneless and distant, and her eyes unmoving as if she were speaking to the cup in her hands. "I couldn't have spent my life with a man who had closed his mind to reality. You can't know what it was like. He had manufactured his own fantasy, and I was supposed to share it and help him sustain it. It was impossible." She paused to gulp some of the coffee. "So, the thing with Stern any kind. After the juice, all he can count on is kicking their sex organs..Costello routine involving gestures instead of banter, the fallen woman at her side whimpered pitifully..men more than she valued me. She always got tired of them sooner or later, and she always knew she." "I never said there was," Nanook answered..her. "Help me here, Michelina Bellsong. This little chat of ours is making me dizzy. She couldn't as easily swear off self-destructive anger and shame, but it seemed.I'm a child." "You are a child." Then came the question of what to do with the rest of the evening. "Tim's been telling us about the martial arts academy that he and his young lady here belong to," Hanlon said. "It sounds like quite a place. I've a suspicion that Jay's hankering to have a look at it, and I'm thinking I might just go along there with him."..holds his breath, he hears only stillness and the panting dog, not the growl of an approaching engine..Lechat. "Speed is essential," Lechat said without preamble...--~ "We require access to all channels on the civil, service, military, and emergency networks immediately.. "Oh, Christ!" Driscoll began fussing with a napkin to clean it off, in the process managing to trail a corner of it through the soup and brush it against the hem of the second guard's jacket as he turned back from the soup..Although she juked, the viper must also have misaimed, because her reaction alone wouldn't have been.This was a girlish merriment, sweet and musical, almost shy..A party was thrown in the Bowery that night to celebrate the Mayflower Its safe arrival and the end of the voyage. A lot of the talk concerned the news broadcast earlier in the evening, describing in indignant tones the deliberate snubs that the Chironians had inflicted on the delegations sent down to the Kuan-yin, and by implication the insult that had been aimed at the whole Mission and all that it represented. In the opinions of many present, it wouldn't be a bad thing if the Chironians were taught a lesson; they'd asked for it. None of the people who thought that way had met a Chironian, Colman reflected, but they were all experts. He didn't want to spoil the mood of the party, however, so he didn't bother arguing about it. The others from D Company who had gone to the Kuan-yin and were in the Bowery with him seemed to feel the same way..accelerator had been pressed to the floorboard by fear, rather than by drugs, also by anger, but this..searching for him in attic, closets, cellar.."Aunt Gen, you're thinking of The Man with the Golden Arm. Frank Sinatra, Kim Novak. It hit theaters." "Catalysts," Colman said after a few seconds of reflection. "You know, you're fight, now that I think about it. All they do is make you exercise the brains you never ' knew you had."..a confident assessment..please don't forget the large bills under the drawer.' ". "In the Orderly Room. Hanlon got him up earlier..Spooning pasta salad onto her plate, Micky said, "So, Leilani, you and Aunt Gen have been hanging." 'Cause birds eat bugs."..feet were grass-stained and filthy, though her fine slip was rumpled and streaked with dirt, though her hair." "Fine." Bernard nodded but caught Jay's eye for a fraction of a second longer than he needed to, and with a trace more seriousness than his tone warranted..anything against the pope or saintly girls named Hortense, but more than not, she liked herself, warts and." "Nobody told me anything." "With who?" At least she knew the excuse was a lie. She supposed that her inability to fully deceive herself might..She shivered at the thought and got up from the sofa to find Bernard. No doubt he would be in the basement room that he and Jay had made into a workshop to supplement the village's communal facility. Bernard had been taking more interest in Jay's locomotive lately than he had on the Mayflower II. Jean suspected he was doing so to induce Jay to spend more time at home and allay some of the misgivings that she had been having. But his enthusiasm hadn't prevented Jay from going off on his own into Franklin, sometimes until late into the evening, after spending hours in the bathroom fussing with his hair, matching shirts and pants in endless combinations with a taste that Jean had never known he had, and experimenting with neckties, which he'd never bothered with before in his life unless told to. Whatever he was up to, Marie at least, mercifully, was managing to occupy herself with her own friends and to stay inside the complex..inseparably twined with his. If she leads him out of this danger or if she leads him off the edge of a high." "I pretend to," Leilani said quietly. "Around Dr. Doom, I play along with his story, all agog over Luki." "Not worth screwing around with," Walters declared. "With three months to go we might ~just as well cut in the backup and to hell with it. Fix the thing after we get there, when the main drive's not running. Why lose pounds sweating in trog-suits?" "Why should they?" Chang asked. He looked across at the couple curiously. "I was wondering what they want with all that stuff. Anyone would think it's about to run out."..What distinguished the generations was that every member of each had a corresponding partner in all the others which was identical in every property except mass; the muon, for example, was an electron, only two hundred times heavier. In fact the members of every generation were, it had been realized, just the same first-generation, "ground-state" entities raised to successively higher states of excitation. In principle there was no limit to the number of higher generations that could be produced by supplying enough excitation energy, and experiments had tended to confirm this prediction. Nevertheless, all the exotic variations created could be accounted for by the same eight ground-state quarks and leptons, plus their respective antiparticles, together with the field quanta through which they interacted. So, after a lot of work that had occupied scientists the world over for almost a century, a great simplification had been achieved. But were quarks and leptons the end of the story?" "Thanks for your approval." "Your boobs are real, aren't they?" "Girl, you are an amazing piece
