"If you say so. Do I have a choice?".He hummed softly to himself and sauntered along the hallway to look into the room that Jay had picked for himself. Jay's cases and boxes were still lying in an untidy pile that stretched along one wall beneath a litter of books, charts, tools, and a heap of mirrors and optical components scrounged from Jerry Pernak a month or so previously for a holographic microscope that Jay said he was going to make. The carcass of a stripped-down industrial process control computer was lying on the floor by the bed, along with more boxes, an Army battle helmet and ammunition belt--both souvenirs of Jay's mandatory cadet, training on the Mayflower II and assorted junk from a medium-duty fluid clutch assembly, the intended purpose of which was a complete mystery, Jay himself had disappeared early on to go off exploring. Bernard shrugged to himself. Europeans were the way they were, they would seize Chiron and convert it to their own corrupt ways if given the chance, and the Mayflower II therefore had two years to teach the Chironians how to protect themselves. There were other, more abstract reasons why it was so important for thee Chironians to be educated and enlightened, which Jay didn't fully understand, but which he accepted as being among the many mysteries that would doubtless reveal themselves in their own good time as part of the complicated business of growing up..a gun under them." "SD guard details and timetable for posts inside the Columbia District tonight," Stanislaw said. They would refrain from doing anything to that one until the last moment..Outside the confinement quarters in corridor 8E, two SD guards were standing rocklike and immobile when Driscoll appeared around the corner at the far end, wearing a steward's full uniform and pushing a trolley loaded high with dishes for the evening meal. Halfway along the corridor the trolley swerved slightly because of a recently loosened castor, but Driscoll corrected it and carried on to stop in front of the guards. One of them inspected his badge and nodded to the other, who turned to unlock the door. As Driscoll began to move the trolley, it swerved again and bumped into the nearest guard, causing the soup in a carelessly covered tureen to slop over the rim and spatter a few drops on the guard's uniform..Colman's eyes widened in surprise. "Him? What in hell does he know about the Mafia?" "You sure? The sky goes away in the dark, and everything gets so big. I don't want her scared." "I can talk around the pie, even if it isn't polite. With two fingers, he pulls down both lower eyelids and examines his eyes? God knows. "Her name's Karla Rhymes," Noah reported. "When she worked as a dancer, she called herself Tiffany." "It's a thought," Wellesley agreed distantly. He cast his eyes round the table. "Does anybody have a better idea?" Nobody did. "So let's get Merrick here and talk to him," Wellesley said. He sat back and placed his hands on the edge of the table. "This would be a good time to break for lunch. Scribe, adjourn the session here. We will reconvene in ninety minutes. Contact Leighton Merrick in Engineering, and have him join us then. Also ask him to bring with him two of his more capable officers. Advise me at once if there are any difficulties. That's all."..Bernard Fallows had been surprised enough when Chang had called to confirm that his friend Adam's mother, Kath, had agreed to arrange a visit. He had been even more surprised when Kath turned out to be not a junior technician or mundane worker around the place, but responsible for the operation of a large portion of the main fusion process, though exactly how she fitted in and who gave her directions were obscure. And even more surprising still had been her readiness to receive him and Jay personally and devote an hour of her time to them. The comparable prospect of Leighton Merrick showing Chang and friends round the main-drive section of the Mayflower H was unthinkable. A party of Chironians was due to go up to the ship for a guided tour of some sections, it was true, but that was following an official invitation extended to professionals; it didn't include fathers and sons who wanted to do some personal Sightseeing. Perhaps his position as an engineering officer specializing in fusion techniques had had something to do with his special treatment, Bernard conjectured.. "Smart . . . brains." A faraway look was coming into Anita's eyes. "Brains and trains. I like it. It's lyrical. Don't you think it's lyrical?" She smiled at Jay and winked saucily. "Hi, Jay." Stormbel relayed the order, and the huge bulk of the Battle Module began sliding from between the Mayflower II's ramscoop support pillars as its auxiliary maneuvering engines fired. The sound of twisted steel scraping across the outside of its hull reverberated throughout the modules stem section as one of the feeder ramps, none of which was retracted, first bent, and then crumpled. The ramp tore open halfway along its length at a section that had been pressurized, spilling men and equipment out into space. At first Noah didn't get it. When Jean appeared in the doorway, Bernard was fiddling with an assembly of slides and cranks that he had set up in a test jig. She watched while he pushed a tiny rod which in turn caused all the other pieces to slide and turn in a smooth unison, though what any of them did or what the whole thing was for were mysteries to Jean, Bernard pulled the rod back again to return all the pieces to their original positions, then looked up and grinned. "I have to take my hat off to Army training," he said. "I'll say one thing for Steve Colman- he sure knows what he's doing. Our son has produced some first-class work here." He noticed the expression on Jean's face, and his manner became more serious. "Aw, try and snap out of it hon. I know everything's a bit strange. What else can you expect after twenty years?
