I wondered, too, when I might see Selene again.."We had our first formal meeting with the Chinese yesterday, and we've already made our first official decision." He glanced at the replica of the star-robot probe again. "SP3 now has a name. On December 12, 1968, I gave a talk to a meeting of doctors and lawyers in San Jose, California. * Naturally, I was asked to speak on some subject that would interest both groups. Some instinct told me that medical malpractice suits might interest both but would nevertheless not be a useful topic. I spoke on genetic engineering instead, therefore, and, toward the end, discussed the matter of cloning. "I've lowered my price to a quarter. Are you interested?" She saw my face and her expression shifted from lewd to wary. "What's wrong, Bert?" "No, no, you must go," Hinda said again. "I cannot have you here at night If you love me, go." Then she added softly, her dark eyes on his, "But come again in the morning." "Oh, yes," said Amos. "I know the sound. Eventually, if all goes well, it will arrive at same place insulated by unimaginable distance from the problems that promise to make strife an inseparable and ineradicable part of the weary story of human existence on this planet." Congreve's expression took on a distant look as he gazed at the replica, as if in his mind he were already soaring with it outward and away. "It will be a new place," he said in a faraway voice. On it the cool water of the stream and its tributaries stood out as black lines forking like twigs; the rock crags and boulders were shades of blue; living vegetation varied from rust brown on the hills to deep red where it crowded together along the lower slopes of the gorge; and shell and bomb scars glowed from dull orange to yellow depending on how recently the explosions had occurred..
