"He wasn't dead then," Geneva assured the girl. "He hadn't even begun to lose his hair yet." Colman shook his head. "There shouldn't be any need. Celia's hair is a lot shorter. There'll be fewer people around later. It'll be okay - . . . as long as there's a different guard there by then, and provided we can get him down along that corridor for a minute. And anyhow, they'll be expecting people to be going in there then." But another who's on his way into the restaurant. "That's sure a fine tailwagger you have there," she said. "Why do people follow leaders?" Pernak replied. "For collective-strength. What do you need collective strength for? Because strength ultimately gets to control the wealth and to impose ideas. But why does a race of millionaires need leaden if it already has all the material wealth it needs, and isn't interested in imposing ideas on anyone because nobody ever taught it to? The Chironians don't. There isn't anything to scare them with. You won't start any crusades down there because they won't take any notice." At one time, she'd been proud of her beauty. Now she wondered why she had taken so much pride in. Next, the man grins at his reflection. This is not an amusing grin. Even viewed in profile, it's an. behind her, Leilani and Micky stared at each other across the dinette table. For languid seconds in the. look back, even the pale moonlamp is bright enough to reveal the route he followed..like me," he pleads.. "Seriously?" Leilani's eyes widened. Her hand paused with a forkful of pasta halfway between plate and. "I wouldn't feel clean with his money in my pocket. I'll be satisfied with payment of that invoice." "Dreams die hard." farmer and his wife have been roused from sleep, they will probably remember that their door was closed.true, all right." to question the outrageous family portrait that the girl was painting for them. "WE'LL TAKE CARE of that." Colman turned his head and called in a louder voice, "Stanislau, Young-come over here and give me a hand with this crate." Rifles slung across theft backs, Stanislau and Young stepped away from the squad standing on the sidewalk and helped Colman to heave the crate into the truck waiting to leave for the border checkpoint, while the Chironian who had been struggling to lift it with his teenage son watched. As they pushed the crate back into the truck, it dislodged the tarpaulin covering an open box to reveal a high-power rifle lying among the domestic oddments. The Chironian saw it and lifted his head to look at Colman curiously. Colman threw the tarp back over the box and tuned away..Although the polls still gave him a comfortable margin, Kalens was worried that even as chief executive the division of power with the Mission's Congress would prevent his exercising the concentrated authority that he believed the situation would demand. Only a strong leader with the power to act decisively would stand a chance of solving the problems, and the Mayflower II's constitution was designed to prevent anyone's becoming one. Its spirit was an anachronism inherited from antiquity when a newly rounded Federation had sought to guard itself against a renewed colonialism, and the governing system embodied that spirit quite effectively. That was the problem.. "We'll work out something. Where and when?" Hanlon said. Colman looked over at Veronica.. "That may be, but it's beside the point that I was trying to make," Merrick said. "Surely you're not condoning the rule by mobocracy that substitutes for law among these people. Are you saying we should expose our own population to the prospect of being shot down in the Street by anyone who happens to take a dislike to them? ". Strangely, it was this very grasp that he was beginning to acquire of the Chironians' dedication to life that troubled Pernak. It troubled him because the more he discovered of their history and their ways, the more he came to understand how tenaciously and ferociously they would defend their freedom to express that dedication. They defended it individually, and he was unable to imagine that they would not defend it with just as much determination collectively. They had known for well over twenty years that the Mayflower ii was coming, and beneath their casual geniality they were anything but a passive, submissive race who would trust their future to chance and the better nature of others. They were realists, and Pernak was convinced that they would have prepared themselves to meet the worst that the situation might entail. Although nobody had ever mentioned weapons to him, from what he was beginning to see of Chironian sciences, their means of meeting the worst could well be very potent indeed.. Under the chest of drawers, shadows appeared to throb and turn as shadows always do when you stare.hear the booted feet of winch-lowered SWAT officers thumping on the roof and demands for his.ISBN 0-553-80137-6.particularly old, but they are going to be a great team. Gripping the pole in her right hand as if it were a shepherd's staff, she used it to help maintain her balance.Kath had moved away to talk to Adam, Casey, and Veronica, who were sitting together beyond the table at which Driscoll was performing. Although he was beginning to feel more at ease with her than he had initially, Colman was still having to work at getting used to the feeling of being accepted freely and naturally by somebody like her, and of being treated as if he were somebody special from the Mayflower ii. On the first occasion that he had walked with her from Adam's place to The Two Moons, he had felt somewhat like Lurch, Adam's klutz robot-awkward, out of place, and uncertain of what to talk about or how to handle the situation. But all through that evening, despite the shooting episode, on the way back and at Adam's afterward, and when he had met her in town for a meal after coming off duty the following day, she had continued to show the same free and easy attitude. Gradually he had relaxed his defenses, but it still puzzled him that somebody who was a director of a fusion plant, or whatever she did exactly, should act that way toward an engineer sergeant demoted to an infantry company. Why would she do something like that? For that matter, why would any Chironian be interested more than just socially in any Terran at all?.Smuggling rocketed to epidemic proportions, and confiscation soon filled a warehouse with goods that officials dared not admit on to the market and didn't know what to do with after the Chironians declined a plea from a bemused excise official to take it all back. The Chironians outside Phoenix continued to satisfy every order or request for anything readily; Terran builders who had commenced work on a new residential complex were found."This July third, just passed, made eighteen years." had a chance, she won by cheating." blue eyes. "Now don't you wish you could see me as

The engineer iii coveralls who had been working inconspicuously at an opened switchbox through an access panel in the floor closed a circuit, and a reinforced fire-door halfway along the corridor - closed itself in the path of the oncoming SD's. The SD major leading the detachment stared numbly at it for a few seconds while his men came to a confused halt around him. "Back to the front stairs," he shouted. Well, I guess... welcome aboard.."'.Ten years went by while North America and Europe completed their recovery, and the major Eastern powers settled their rivalries. At the end of that period New America extended from Alaska to Panama, Greater Europe had incorporated Russia, Estonia, Latvia, and the Ukraine as separate nations, and China had come to dominate an Eastern Asiatic Federation stretching from Pakistan to the Bering Strait. All three of the major powers had commenced programs to reexpand into space at more or less the same time, and since each claimed a legitimate interest in the colony on Chiron and mistrusted the other two, each embarked on the construction of a starship with the aim of getting there first to protect its own against interference from the others..from a delicious dream..The dog's Hanks shudder, striking sympathetic shivers in the boy. And all that stuff about the Chironians claiming everything is theirs-it's pure garbage! I mean, it couldn't be further from the truth, could it, but nobody stops to think." He frowned to himself for a moment. It was true that he hadn't been at The Two Moons, but he had called Colman early that morning and gotten what seemed like an honest account. But with Jean acting the way she was, he didn't want to mention that. "Anyhow, the facts about the shooting are on record," he said. "All you have to do is ask Jeeves.."Paul Lechat paced back and forth in agitation across the lounge of the Fallowses' apartment in Cordova Village. Swyley and Stanislau were behind him in a corner with a mixed group of Chironians and seemed interested in the planet's travel facilities; Sirocco was with another group in the center of the room discussing the war news with another group, and Maddock, looking slightly disheveled, was sprawled along a couch in an alcove on the far side with his-arm draped around Wendy, another girl from the Mayflower II, who seemed to be asleep. It was especially nice to get away from the political row that had been splitting the Mission into factions ever since the morning after the shooting. Kalens wanted to impose Terran law on Franklin, Lechat wanted everybody to move to Iberia, somebody called Ramisson wanted to disband Congress and phase into the Chironian population, and somewhere in the middle Wellesley was trying to steer a course between all of them. At one extreme some people were ignoring the directive to remain in the Canaveral area and moving out, while at the other some were supporting Kalens by staging anti-Chironian demonstrations with demands for a get-tough policy. Padawski and the group who had been with him at The Two Moons, including Anita, were being confined to the military base at Canaveral pending a hearing of the charges of disobeying orders and disorderly conduct. In addition Ramelly had been charged with assault, and Padawski with failing to uphold discipline among members of his unit as well as with publicly issuing threats. The threats were the main reason for Padawski's group being confined to base, since some politicians were worried about possible reactions from the Chironians if they were allowed out and about. Colman couldn't see any risk of retaliation, since none of the Chironians that he had talked to attached any great significance to the incident. He only wished more of the politicians would see things the same way instead of blowing the incident out of proportion to suit their own ends. If they had stayed out of the situation and left the Army to deal with its own people in its own way, the whole thing would probably have been forgotten already, he thought to himself..revealing that it wasn't locked. No spell had been cast on the mechanism, after all. Curtis's failure to open."I remember him shooting Vernon. I wish I didn't, but] do." Earlier, sadness had cast a gray shadow..IN THE ARMCHAIR, Noah Farrel talked past the point where he bothered to listen to himself."They don't have to make sense. All they have to do is say you're different. Now do you get it? Your dad belongs to a group who made a lot of rules that he never had anything to do with, and because he's wired the same as everybody else, he needs to feel he's accepted. To be accepted, he has to be seen to go by the rules. If he didn't he'd become a threat to the group, and they'd reject him. And nobody can take that. Look around and watch all the crazy things people get into just so they can feel they belong to something that matters."..saddles. The white cab features a spotlight rack on the roof. "There's been some fighting inside the Battle Module, and a lot of the guys got out. We have to hope that there aren't enough left to stop us from blowing our way in through four places at once.
