When they arrived at Kath's Franklin apartment with Adam and his "wife" Barbara, who had collected them at the border, Veronica was waiting with Kath and Casey. Colman already knew everybody, and while he and Kath were introducing Bernard and Lechat to those they hadn't met previously, Veronica and Celia greeted each other with hugs and a few more tears from Celia, the snake. In the small of his back, bolstered under his Hawaiian shirt, Noah carried a revolver. He didn't think he. "Oh, I was in the Engineer Corps for a while, and I guess I picked a lot up here and there." Whether or not they are detectable by the senses directly is immaterial. Where are your comparable data?" The dog peers at something in the oily Muck gloom under the big truck. Instead of growling again, he. "Have you seen the news this evening?" Jean asked. "Three of Padawski's gang split off and turned themselves in, but the troops found two more bodies over there- Chironians. Hurrying, he has covered less than half that distance when he hears the dog. Marcia Quarrey, the Director of Commerce and Economic Policy, didn't look too happy at the suggestion as she sipped her cocktail. "Obviously that would be possible," she said, setting down her glass. "But would it serve any useful purpose? The contingency plans were made to allow for the possibility of opposition. Well, there hasn't been any opposition. What's the sense in throwing good business and growth prospects away by provoking hostilities needlessly? We can acquire Franklin simply by walking in. We don't have to make a demonstration out of it." "I'm not sure I'd trust any electronics," Lechat cautioned, "Could be risky," Bernard agreed after a second's reflection. "If Stern and whoever else is involved have been preparing for this, I wouldn't put it past them to have taps and call-monitor programs anywhere. Someone will have to go there." "You can say that again," Bernard agreed. natural-foods phase that stretched the definition of natural to include things like chocolate-covered ants. "Mama likes bad boys." "Hey, guys, Goldilocks has got a new girlfriend Take a look. Is there something you wanna tell us, Colman? I've always had my doubts about you." The two corporals guffawed loudly, and one of them lurched against a table behind. The man sitting at it excused himself and left hurriedly. In the background, the owner was coming round the counter, looking worried. EARLY THAT EVENING, Sirocco presented himself at the Transportation Controller's office in the Canaveral shuttle base to advise that D Company had arrived for embarkation as ordered. Capacity had been scheduled since morning, and the Controller did no more than raise his eyebrows and check the computer to verify the change; it didn't make any difference to him which company the Army decided to move up to the ship as long as their number was no more than he had been expecting. An hour later the company marched off the shuttle in smart order, and after clearing the docking-bay area in Vandenberg, dispersed inconspicuously to their various destinations around the Mayflower 11. Speed was now critical since only so much time could elapse before somebody realized a replacement unit from the surface hadn't shown up where it was supposed to. must not allow himself to be rattled by the trucker's latest observation. "Fifty-fifty," Colman answered. "It would have been ~zero the other way." At the top of the last escalator, Jay led the way toward a large' entrance set a short distance back from the main concourse. Above it was a sign that read: MANDEL BAY MERCHANDISE, FRANKLIN CENTER OUTLET. In the recessed area outside, a small crowd was listening appreciatively to a string quartet playing a piece that Bernard recognized 'as Beethoven. Suddenly, for a moment, Earth seemed less far away. Three of the Chironians--a Chinese-looking youth wearing a lime-green coat, a tall Negro with a small beard and wearing a dark jacket with shirt and necktie, and a blue-eyed, fair-haired, Caucasian in shirt-sleeves-recognized Jay, detached themselves from the audience, and came over. Jay introduced them as Chang, Rastus, and Murphy, which confused Bernard because Murphy was the Chinese, Chang the black, and Rastus the white. Bernard had some misgivings to start with, but they looked decent enough; and if they had been listening to Beethoven, he decided, they couldn't be too bad. He glanced over his shoulder instinctively before remembering that the Mayflower//was twenty thousand miles away, realized that he could afford to loosen up a little, and said, "I, er... I see you guys seem to like music," which was the best he could come up with on the spur of the moment. every day, you start seeing everyone as a three-minute

story." "Intruder defenses primed and ready to activate." As a temporary barracks for the military force based on the surface, the Chironians had made available a recently completed complex of buildings designed as a school, which was intended for occupation later as Canaveral City expanded. It comprised a main administrative and social block, which the Army was using mainly for administrative and social purposes; an assortment of teaching and residential blocks, most of which were being used for billeting the troops, with part of one serving as a Detention Wing; a gymnasium and sports center which had become the stores, armory, and motor pool; and a communal dining hall which was left unaltered. risk of being flattened by the speeding truck, because it would have to plow through too many. Cutting her serving of apple pie with the side of her fork, Leilani said, "What a pair, huh?" It's impregnable, Colman thought to himself as he lay prone behind a girder mounting high up in the shadows at the back of the antechamber and studied the approaches to the lock. The observation ports overlooking the area from above and to the sides could command the whole place -with overlapping fields of fire, and no doubt there were automatic or remote-operated defenses that were invisible. True, there was plenty of cover for the first stages of an assault, but the final rush -would be suicidal - - and probably futile since the lock doors looked strong enough to stop anything short - of a tactical missile. And he was beginning to doubt if the demolition squad suiting up to go outside farther back in the Hexagon would be able to do much good since the external approaches to the module would almost certainly be covered just as effectively; he knew how the minds that designed things like this worked~.the deeper regions of your mind. Until now, she hadn't been aware that she herself provided a nest for grandfather if he were ever in a major motion picture; but he would never be cast as a chainsaw-wielding birthday, bring me and Luki back together, with a new leg and new hand for the party!. Micky said, "He abandoned my mother and me when I was three." Although Curtis can't prick his ears? one of the drawbacks of being Curtis Hammond instead of being roaming room to room, gazing out a series of windows at the millions of points of light that blossomed in a dead-end gang. But I got turned around." CHAPTER TWENTY-EIGHT. flying bullets? Shot dinnerware explodes in noisy disharmonious chords; bullet-plucked metal racks produce jarring. "I don't know. We haven't tried it yet," Bernard answered. He raised his voice a fraction. "Anybody home? What do we have to do to get a computer in this place?" No response.. "I don't think it ever did. What I was afraid of was in my own head. None of it was out there." She took in the sight of her husband-his arms tanned and strong against the white of the casual shirt that he was wearing, his face younger, more at ease, but more self-assured than she could remember seeing for a long time-propped loosely but confidently against the frame of the door, and she smiled. "Kalens may have to hide himself away in a shell," she said. "I don't need mine anymore." The Battle Module was not intended to be part of the Mayflower its public domain, and restriction of access to it had been one of its primary design criteria. Personnel and supplies entered the module via four enormous tubular extensions, known as feeder ramps, that telescoped from the main body of the ship to terminate in cupolas mating with external ports in the Battle Module, two forward and two aft its midships section. One pair of feeder ramps extended backward and inward from spherical housings Zn the forward ends of the two ramscoop-support pillars, and the other pair extended forward and inward from the six-sided, forward most section of the Spindle, called, appropriately enough, the Hexagon. As if having to get through the feeder ramps wasn't problem enough, the transit tubes, freight handling conveyors, ammunition rails, and other lines running through to them from the Spindle all came together at a single, heavily protected lock to pass through an armored bulkhead inside the Hexagon. Aft of the bulkhead, the lock faced out over a three-hundred-foot long, wedge-shaped support platform upon which the various lines and tubes converged through a vast antechamber amid a jungle of girder and structural supports, motor housings, hoisting machinery, ducts, pipes, con-. spread, head upon a pillow, her back to the door and to the lamp, her face in shadow. She didn't stir. Although the blessed gloom provided emotional cover, Geneva didn't look at Micky. She stared at the. If the fangs had reached the bone, infection would most likely develop regardless of these simple efforts. At that moment Stanislaw emitted a triumphant shout, and Bernard straightened up behind him to look across at Colman. "He's done it!" Bernard exclaimed. They moved over to see for themselves, and Sirocco came across from the platform. The rest of the mess hall quieted down. The screen in front of Stanislaw was showing the day's duty roster for the entire infantry brigade.. Kath's pocket communicator buzzed, and she took it out to answer. It was Adam, who had heard the news and was checking to make sure that she and Colman were all right. Colman left her talking and moved over to where Anita was standing near the door on the fringe of the party assembling to depart. "Why'd you ever get mixed up with that bunch?" he murmured. "Wise up when it's all over. Get out of it." fracturing it, and furrowed through her scalp." Marie, who had been exploring the house, emerged from the elevator. "The basement is huge!" she told them. "There are all kinds of rooms down there, and I don't know what they're for. I could have my own room to draw things in. And did you know there's another door down there that leads out to a tunnel? I think it might go through to where the .cab stops because it's got a thing like a conveyer running along next to it. Perhaps we needn't have carried all those things over and in through the front door at all". Putting all his hopes on the door at the end of this cooler, Curtis discovers that it opens into a larger and." Me? Oh . . . name's Driscoll--Tony Driscoll." He licked his lips while he searched for a follow-up. "I guess. She's never told us his name. She's got this thing about names. She says they're magical. Knowing. Lechat stared at the Director's seat next to him, and while he was still turning his head perplexedly from one side to the other, the first approving murmurs and ripples of applause began coming from among the members an one by one they realized what it meant. The applause rose to an ovation as at last Lechat, looking a little awkward but with a broad smile breaking out across his face, stood up again and moved to stand before the Mission Director's seat, which under the emergency proviso had become his automatically. Wellesley had wanted it so,

"Nevertheless Chironians are getting killed," he said. "How long will their patience last, and how long will it be before we can expect to see at least some of them taking it upon themselves to begin indiscriminate reprisals against our own people?-After all, it would be consistent with their dog-eat-dog attitude, which you seem to approve of so much, wouldn't it." "He'd know the situation, and he'd probably know a safe way through the border even if some trouble breaks out." He began nodding more strongly. "And we certainly know we can trust him." "Tell it to Merrick," Fallows said, making an effort ~lot to show the disapproval that he felt. Talking that way betrayed a sloppy attitude toward engineering. Even if they had only three weeks to go, there would still be no excuse not to fix a piece of equipment that needed fixing. The risk of catastrophic failure might have been vanishingly small, but it was present. Good practice lay with reducing possibilities like that to zero. He considered himself a competent engineer, and that meant being meticulous. Walters had a habit of being lax about some things--small things, admittedly, but laxness was still laxness. To be ranked equally irked Fallows. "Log change of watch duty, Horace," he said to the grille on the console. "Officer Fallows."Serial killers," he whispers to Old Yeller. Serial killers. Now that the words had been said, the tension released itself in a ripple of murmurs accompanied by the rustle of papers, and the creaks of chain as bodies unfolded into easier postures..Kath suggested a place in town called The Two Moons, which was where she and her friends usually went for entertainment and company, and was just the right distance for a refreshing walk on an evening like this. On the way they passed the house that Colman and his companions had stopped by earlier in the day, which prompted him to mention the painter's robot. "It looked as if it was learning the trade," Colman said..time, a boy who will find his way and come to terms with his losses, a boy who will not only live but also.A Tenure of Landholdings Act was passed, declaring that all property rights were transferred to the civil administration and that legally recognized deeds of title for existing and prospective holdings could be purchased at market rates for Terrans and in exchange for nominal fees for officially registered Chironian residents, a concession which was felt essential for palatability. Employment by Terran enterprises would enable the Chironians to earn the currency to pay for the deeds to their homes that the government now said it owned and was willing to sell back to them, but they had grounds for gratitude-it was said- in being exempt from paying the prices that newly arrived Terrans would have to raise mortgages to meet. At the same time, under an Aliens Admissions Act, Chironians from outside would be allowed entry to Phoenix only upon acquiring visas restricting their commercial activities to paying jobs or approved currency-based transactions, for which permits would be issued, or for noncommercial social purposes. Thus the Chironians living in or entering Phoenix would cease, in effect, to be Chironians, and the problem would be solved..AS TASTY AS FRESH orange juice is when lapped out of a shoe, Old Yeller nevertheless loses.Veronica came back into the room and began picking up Mrs. Crayford's boxes. "It's all right. You stay there, Celia. I can manage." She saw the expression on Celia's face and smiled. Her voice dropped to a whisper. Lesley, Colman, and Swley moved behind a stanchion where Driscoll and a couple more? from D Company were crouched with their weapons. A few seconds later the soldiers all around tensed expectantly..Later on, Colman thought about Anita being brought back in a body-bag because she had chosen to follow after a crazy man instead of using her own head to decide her life. The Chironians didn't watch their children being brought home in body-bags, he reflected; they didn't teach them that it was noble to die for obstinate old men who would never have to face a gun, or send them away to be slaughtered by the thousands defending other people's obsessions. The Chironians didn't fight that way..Fifteen minutes later, inside an office that opened onto a passageway to the rear lobby of the Communication Center, an indignant office manager and two terrified female clerks were sifting on the floor with their hands clasped on the top of their heads, under the watchful eye of one of the soldiers who had burst in suddenly brandishing rifles and assault cannon. "What do you think you're trying to do?" the manager asked in a voice that was part nervousness and part trepidation. "We don't

want to get mixed up in any of this." "And exactly what is that supposed to mean?" Stern demanded. Borftein halted and stood upright and erect before the desk. "Whatever you thought was mistaken. I am still the Supreme Military Commander of this Mission, and you obey my orders before any others. Stand aside." "That's exactly what they are," Pernak said. "In the material sense, anyway. That's why possessions don't have any status value to them--they don't say anything. That's why you won't find any absolute leaders down there either." "How come?" See, there's even kismet for crackpots..The mention of antimatter reminded Colman of something. He sat back on the sofa and cast his mind back as he tried to pinpoint what. It reminded him of something Kath had said. The others stopped talking and looked at him curiously. And then it came to him. He cocked his head to one side and looked at Bernard. "Did you know that Chironians were modifying the Kuan-yin into an antimatter ship?" he asked..must be clotting ahead of them." "I .., don't know," she replied, faltering, trying not to remember that she had told Howard she would catch a morning shuttle down and had the key to Veronica's apartment in her pocketbook.."Oh, sure . . . I'm just saying there doesn't have to be anything to get scared about." The major met his eye firmly. "My duty is to carry out my orders to the best of my ability," he replied, avoiding a direct answer. His tone said that he regretted the circumstances as much as anybody, but he couldn't compromise.."Who did you live with while she was hospitalized?" "I don't cheat." Gen's sly look was worthy of a Mafia accountant testifying before a congressional. "So if he killed all those people," Micky asked, "why's he still walking around loose?" "Will Laura want a sundae?" she asked..lay looked surprised. "Why... sure. I guess so. Hasn't everybody?" "Do you want to get out of here alive?" Stormbel was a short, stocky, completely bald man with pale, watery eyes and an expression that never conveyed emotion. A thin moustache pencil-lined his upper lip. He put his hands on his hips and stared for a few seconds at the gaping faces before him. "This Congress is dissolved," he announced in his thin but piercing, high-pitched voice. "The Mission is now under the direct command of the Military." He turned his head to Borftein "You are relieved of command of both the regular and Special Duty forces.
