

TIER UND PFLANZE IN INTRAZELLULARER SYMBIOSE

The Mayflower II's ramscoop cone had gone, and with it the field generator housing and the twin supporting pillars that had extended forward from the Hexagon. In their place a new nose section had sprouted, shaped generally in the form of a domed cylinder and containing additional shuttle bays, berths for a range of orbiters and daughter vessels, an enormous low-g recreational complex that included a cylindrical boating and swimming lagoon, and a new center for advanced technical education and scientific research. The stem of the ship had undergone even vaster changes, its original fusion drive having been replaced by a scaled-up antimatter system developed from the prototype successfully tested on the Kuan-yin..boy. They had tried to fob him off with the command of what they had seen as a proficient but small and unimportant corps of specialists. They had all paid too. Now they all knew who he was and where they stood. He had no regrets about Ramisson's death; it underlined the lesson more forcefully than any words could have done. He was only sorry he hadn't made a cleaner sweep by shooting them all..Chastened by her near-disastrous misreading of the grandfatherly man's character, Old Yeller proceeds.for him..and holding Celia's handkerchief to her face with the other. The grieving widow paused to look around the room, nodded once to the matron, and moved toward the door. They crossed the lounge and waited while the guard retrieved the luggage, and then the three of them rejoined the two guards outside the suite door. The party then reformed and began descending the stairs. -.good right hand, the pleasing face. Pride had nothing to do with it, either. "If you want to put it that way.".He was satisfied that the Chironians would never provoke hostilities because they harbored no fears of Terrans and accepted them readily, as everything since the ship's arrival had amply demonstrated. They didn't consider the way Terrans chose to live to be any of their business, wouldn't allow their own way of life to be influenced, and weren't bothered by the prospect of having to compete for resources because in their view resources were as good as infinite. But he felt less reassured about the Terrans- at least some of them. Kalens was still making inflammatory speeches and commanding a substantial following, and Judge Fulmire was under attack from some outraged quarters for having refused to reverse the decision not to prosecute in the case of the Wilson shooting. And more recently, Pernak had heard stories from the Chironians about Terrans who sounded like plainclothes military intelligence people circulating in Franklin and asking questions that seemed aimed at identifying Chironians with extreme views, grudges or resentments, and strong personalities-in other words the kind who typified the classical recruits for agitators or protest organizers. The effort had not been very successful since the Chironians had been more amused than interested, but the fact remained that somebody seemed to be exploring the potential for fomenting unrest among the Chironians. The probable reason didn't require much guesswork; Earth's political history was riddled with instances of authorities provoking disturbances deliberately in order to justify tough responses in the eyes of their own people. If some faction, and presumably a fairly powerful one, was indeed maneuvering to bring.Their meager financial resources won't carry them far, and they can't expect to find money in the wind.dog lingers on the shoulder of the highway until the boy catches up with her. "We could be walking into anything. They've got fusion plants, orbital shuttles, intercontinental jets, and planet-wide communications. How do we know they haven't been working on defense? They've got the know-how and the means. I can see John's point, but his approach is too risky.". "Sure. It's on the lakes.".The Chironian rubbed his chin dubiously. Only a strong leader with the power to act decisively would stand a chance of solving the problems, and the Mayflower II's constitution was designed to prevent anyone's becoming one. Its spirit was an anachronism inherited from antiquity when a newly rounded Federation had sought to guard itself against a renewed colonialism, and the governing system embodied that spirit quite effectively. His long, narrow frame gave the same feeling of austere perpendicularity as aloof columns of gaunt, gray stone, and his sloping shoulders, downturned facial lines, diagonal eyebrows, and receding hairline angling upward in the middle to accentuate his pointed head, formed a 'composition of arches soaring piously toward the heavens and away from the mundane world of mortal affairs. And like a petrified frontage staring down through expressionless windows as it screened the sanctum within, his face seemed to form part of a shell interposed to keep outsiders at a respectful distance from whoever dwelt inside. Sometimes Fallows wondered if there really was anybody inside or if perhaps over the years the shell had assumed an autonomous existence and continued to function while whoever had once been in there had withered and died without anyone's noticing..would need the weapon. Nevertheless, he had no plans to remake it into a plowshare..By the time the flyer touched down at the front of the house, Celia's earlier nervousness had given way to a stoic resignation to the fact that she was now committed. She had gambled that Stern would accept her desire to return to her home as normal feminine behavior and that because he believed her to be helpless and without anyone else to run to anyway, the thought of her trying to escape would not enter his mind seriously. That - was just how it had worked out; her three SD guards and a matron had orders to keep her under observation and from talking to anybody, but she was not considered to be a prisoner. Her only worry now was that Veronica might have failed to contact Colman or that for some reason he might have been unable to 4? anything.."Does he expect you tonight?" Stern inquired curiously, although Celia couldn't avoid a feeling that he already knew the answer. She shook her head. "Where are you supposed to be?..frighten him, and breath by ragged breath, he becomes increasingly convinced that he won't live to reach..CHAPTER THIRTY FIVE.5. "We're through, really,' she said. "Shall we carry on and see the

town?" four rioters were left behind with sore heads or other minor injuries. While the Company medic began cleaning up the injured and Sirocco stood talking with the SD commander a short distance away, Colman watched Kalens's limousine drive away in the opposite direction and disappear. That was how it had always been, he could see now. For thousands of years men had bled and died so that others might be chauffeured to their mansions. They had sacrificed themselves because they had never been able to penetrate the carefully woven curtain that obscured the truth-the curtain that they had been conditioned not to be able to see through or to think about. But the Chironians had never had the conditioning..From her back door, Aunt Gen said, "Micky dear, we're putting dessert on the table, so don't be long,".minute, deeper than mere night.."Yeah, well, by nature I'm a huge pudding. I've got to work hard to stay like this." "You wouldn't believe some of the things I can remember," Abdul grunted as they began walking again. "Darned machines... always did just what we told 'em. "Why's it so important to be better than somebody?" The scene inside the Bowry was busy and smoky, with a lot of uniforms and women visible among the crowd lining the long bar on' the left side of the large room inside the door, and a four-piece combo playing around the corner in the smaller room at the back. Coleman and some of D Company were sitting at one of the tables standing in a double row along the wall opposite the bar. Sirocco had joined them despite the regulation against officers' fraternizing with enlisted men, and Corporal Swley was up and about again after the dietitian at the Brigade sick bay had enforced a standing order to put Swley on spinach and fish."Mrs. D, you don't mind she- calls your brother a selfish pig?" Colman nodded. "I guess so. I'll probably be asleep when you come off duty. Better give me a call." "Why would he kill a helpless child?" Geneva asked.."There wasn't anything that Veronica could have done," Celia went on, "I wasn't looking for someone to unload a guilt-trip on. What I had to say was a lot bigger than that. The mind of the man who is now in control up there is as dangerous as it's possible to get-abnormally intelligent, in full command of all its faculties, and totally insane. Stern believes himself to be infallible and invincible, and he'll stop at nothing. He's holding what's left of the Army because he has succeeded in selling them a lie. And I was the only person who could expose that lie. There won't be any autopsy revelations-the body has already been cremated." Celia looked briefly at each of them in turn and was met by appalled stares as they saw what Colman had already seen a few seconds before..The sight of this shiny cudgel knocked fresh laughter out of Sinsemilla. She clapped her hands, oblivious.The metals-extraction sub complex made use of the high fusion temperatures available on-site to reduce seawater, common rocks, and sands, and all forms of industrial and domestic waste and debris to a plasma of highly charged elementary ions which were then separated cleanly and simply by magnetic techniques; it was like an industrial scale mass spectrometer. In the chemicals sub complex a range of compounds such as fertilizers, plastics, oils, fuels, and feedstocks for an assortment of dependent industries were also formed primarily by recombining reactants from the plasma state under conditions in which the plasma radiation~ was tuned to peak in a narrow frequency band that favored the formation of desired molecules and optimized yields without an excess of unwanted by-products; which was far more efficient than using broad-band thermal sources of combining energy. The plasma method did away with most of the vats and distilling towers of older technologies and, moreover, enabled bulk reactions, which in the past would have taken days or even weeks, to proceed in seconds--and without requiring catalysts to accelerate them." "What?" Driscoll stared at them aghast. "I've never talked to classes of people. I wouldn't know how to start." "A good time to start practicing then," Ci suggested. He swallowed hard and shook his head. "I have to stay here. This conversation is enough to get me shot as it is." Ci shrugged but seemed content not to make any more of it. "Are you two, er... teachers here or something. like that?" Driscoll asked..Gaulitz nodded emphatically. "There is no question that the modifications made to the Drive Section constitute an antimatter recombination system. Celia raised her head suddenly to look up at Lechat. "But I only shot him twice, not six times as the soldiers found. And the house hadn't been broken into when I left. Don't you see what that means?" "Never let him adopt you," Micky said. "Even Leilani Klonk is preferable to Leilani Doom." "Was that why those guys took off?" Jay asked, by now having regained most of his color. "It probably had something to do with it," Colman said, grinning. "That's the kind of trash you have to deal with. Still interested?" "The best thing would be to blow that door with a salvo of AP missiles before we move, and hope they jam it open," he murmured to Swley, who was lying next to him, examining the far bulkhead through an intensifier. The main base that you came in through was only built about ten years ago. Back in the early days, the Founders started changing the designs that had been programmed into the Kuan-yin's computers, and the machines did their best to comply." She sighed. "And this is what it ended up like. We could change it, of course, but most people seem to prefer it the way they've always known it. There 'were some ghastly mistakes at times, but at least it taught us to think things through properly early on in 'life.
